MBAFT-7905: STRATEGIC INNOVATION IN HEALTH CARE AND EDUCATION ......... 243
I. About the Department

Faculty of Management Studies (FMS, Delhi) is one of the oldest Business Schools in the country, established in 1954 under the aegis of the University of Delhi. The faculty was started as one of the departments of the Delhi School of Economics and has grown to be a full-fledged management faculty. Leveraging inspiration and vital resources from the University system, it has been contributing to the industry, business, government and social sector at a level which is at par with the leading management institutes of the country.

In the year 1954, the Masters Programme in Management for the working executive was the first academic programme offered by FMS. It commenced its MBA (Full-Time) Programme in 1967. The Shanti Prasad Jain Advanced Management Research Centre was established in the year 1982 at the University of Delhi-South Campus to promote research and training of managers from India and abroad. The faculty over the years has gained prominence for its learned faculty members and students who today occupy coveted positions in the corporate world, both in India and abroad.

FMS has the unique privilege of being a part of one of the premier universities of the world - the University of Delhi - with some of the finest departments of Economics, Law, Sociology, Psychology, Anthropology, Commerce and Operations Research. Our collaborative approach involves inputs from various departments that give the benefit of a much wider view and deeper understanding of the concepts as well as the context. Our frequent industry interactions, strong industry interface and mentorship programmes consistently add to the knowledge of the relevant tools and enhance the ability to decisively think through problems and opportunities. Our excellent placement record, over the years, only reiterates the fact that at FMS pursuit of excellence, striving for perfection and relentless perseverance are the cornerstones of our rich cultural legacy.
II. Introduction to CBCS (Choice Based Credit System)

Choice Based Credit System:
The CBCS provides an opportunity for the students to choose courses from the prescribed courses comprising the core, elective/minor or skill-based courses. The courses can be evaluated following the grading system, which is considered to be better than the conventional marks system. Grading system provides uniformity in the evaluation and computation of the Cumulative Grade Point Average (CGPA) based on student’s performance in examinations which enables the student to move across institutions of higher learning. The uniformity in the evaluation system also enables potential employers in assessing the performance of the candidates.

Definitions:
(i) ‘Academic Programme’ means an entire course of study comprising its programme structure, course details, evaluation schemes etc. designed to be taught and evaluated in a teaching Department/Centre or jointly under more than one such Department/ Centre

(ii) ‘Course’ means a segment of a subject that is part of an Academic Programme

(iii) ‘Programme Structure’ means a list of courses (Core, Elective, Open Elective) that makes up an Academic Programme, specifying the syllabus, Credits, hours of teaching, evaluation and examination schemes, minimum number of credits required for successful completion of the programme etc. prepared in conformity with University Rules, eligibility criteria for admission

(iv) ‘Core Course’ means a course that a student admitted to a particular programme must successfully complete to receive the degree and which cannot be substituted by any other course

(v) ‘Elective Course’ means an optional course to be selected by a student out of such courses offered in the same or any other Department/Centre

(vi) ‘Open Elective’ means an elective course which is available for students of all programmes, including students of the same department. Students of other Departments can opt these courses subject to fulfilling eligibility criteria as laid down by the Department offering the course.

(vii) ‘Credit’ means the value assigned to a course which indicates the level of instruction; One-hour lecture per week equals 1 Credit, 2 hours practical class per week equals 1 credit. Credit for a practical could be proposed as part of a course or as a separate practical course

(viii) ‘SGPA’ means Semester Grade Point Average calculated for the individual semester.

(ix) ‘CGPA’ is Cumulative Grade Points Average calculated for all courses completed by the students at any point of time. CGPA is calculated each year for both the semesters clubbed together.
(x) ‘Grand CGPA’ is calculated in the last year of the course by clubbing together of CGPA of two years, i.e., four semesters. Grand CGPA is being given in Transcript form. To benefit the student, a formula for conversion of Grand CGPA into percentage marks is given in the Transcript.

Programme Objectives (POs):
MBA—the two-year full-time programme is designed with the objective of developing young men and women into highly adept professional managers, capable of working in diverse sectors, continuously striving for excellence in performance, while propagating thought leadership and contributing to the welfare of the society at large. The curriculum of the continuously evolving MBA - two-year full-time programme rests on two pillars: one, providing a strong analytical foundation in key functional areas and the other, enabling a high degree of academic flexibility, thereby allowing students to customize their MBA experience.

The programme nurtures and develops world-class business leaders with personalized care and attention, in small workgroups and teams and in a practical, application-oriented environment. Every year aspirants avail the opportunity of realizing their dreams through this programme after proving their mettle in one of the most rigorous selection processes.

Programme Specific Outcomes (PSOs):
The faculty strives to achieve the following specific outcomes from its MBA (Full Time) programme:

PSO1 Helps students in becoming highly adept professional managers.

PSO2 Helps students explore the practical application of the management concept.

PSO3 Empowers students in developing their capability to do creative innovation and the ability to execute the same in real-life situations.

PSO4 Helps students create synergies amongst the most diverse set of variables and their ability to continuously learn, improvise, adapt, energize, excel and grow.

PSO5 Encourages students on their professional development plans by reflecting on their first year’s learning and Summer Internship experiences.

PSO6 Provides a strong analytical foundation in key functional areas as well as a high degree of academic flexibility, thereby enabling them to take up leadership roles in future.

PSO7 Inculcate respect for diversity, sensitivity towards societal needs and ethical attitude
III. MBA (Full Time) Programme Details:

Semester wise Details of MBA (Full Time) Course

PART I: FIRST YEAR

The schedule of First Year Part I examination shall comprise of two semesters: Semester I and Semester II. The schedule of papers during the first year of the programme shall be as follows:

Semester - 1
- MBAFT-6101 Organizational Behaviour
- MBAFT-6102 Data Analysis and Decision Tools
- MBAFT-6103 Managerial Economics
- MBAFT-6104 Accounting for Managers
- MBAFT-6105 Marketing Management
- MBAFT-6106 Human Resource Management
- MBAFT-6107 Business Communication
- MBAFT-6108 Information Technology Management

Semester- 2
- MBAFT-6201 Organization Effectiveness and Change
- MBAFT-6202 Decision Modeling and Optimization
- MBAFT-6203 Economic Environment of Business
- MBAFT-6204 Corporate Finance
- MBAFT-6205 Management Accounting
- MBAFT-6206 Production and Operation Management
- MBAFT-6207 Marketing Research
- MBAFT-6208 Management of Information System

Summer Training

On completion of the first two semesters in the first year and before the commencement of the third semester in the second year, a student is required to undergo summer training in an organisation. A report based on the summer training shall be submitted within four weeks from the commencement of the third semester.

PART II: SECOND YEAR

Admission to Part II Second Year of the programme shall be open to only those students who have cleared successfully at least twelve papers out of the sixteen papers offered during the First Year of the programme comprising of 1st and 2nd Semesters taken
together. However, each student would have to clear the remaining papers while studying in Second Year (Part II).

The schedule of Second Year (Part II) Examination shall comprise two semesters: Semester 3 and Semester 4. The schedule of papers during the Second Year of the programme shall be as follows:

**Semester – 3**

During Semester 3 of the program, in addition to the three compulsory papers, a student shall have to choose five elective courses from the list of optional papers announced at the beginning of Semester 3. Compulsory papers are listed here; elective papers are listed area-wise.

MBAFT-6301 Business Ethics & Sustainability
MBAFT-6302 Strategic Analysis
MBAFT-6303 Project Study

**Semester- 4**

During Semester 4 of the program, in addition to the three compulsory papers, a student shall have to choose five elective courses from the list of optional papers announced at the beginning of Semester 4. Compulsory papers are listed here; optional papers are listed area-wise.

MBAFT-6401 Legal Environment of Business
MBAFT-6402 Strategic Management
MBAFT-6403 Global Business Management

2. MBAFT-7302 Entrepreneurship, Creativity, and Innovation

AREA - 4: FINANCE
1. MBAFT-7401 Quantitative Analysis of Financial Decisions
2. MBAFT-7402 Security Analysis and Portfolio Management
3. MBAFT-7403 Financial Analytics
4. MBAFT-7404 International Financial Management
5. MBAFT-7405 Merchant Banking and Financial Services
6. MBAFT-7406 Management Control System
7. MBAFT-7407 Corporate Taxation
8. MBAFT-7408 Financial Derivatives
9. MBAFT-7409 Project Planning, Analysis, and Management
10. MBAFT-7410 Financial Risk Management
11. MBAFT-7411 Fixed Income Securities
12. MBAFT-7412 Financial Markets and Institutions
13. MBAFT-7413 Financial Reporting
14. MBAFT-7414 Mergers and Corporate Restructuring

**AREA - 5: INFORMATION TECHNOLOGY MANAGEMENT**

1. MBAFT- 7501 Managing E-Business
2. MBAFT- 7502 Business Process Re-engineering
3. MBAFT- 7503 Strategic Management of Information Technology

**AREA - 6: MARKETING**

1. MBAFT- 7601 Consumer Behaviour
2. MBAFT- 7602 Advertising Management
3. MBAFT- 7603 Competitive Marketing
4. MBAFT- 7604 Business Marketing
5. MBAFT- 7605 Sales Force Management
6. MBAFT- 7606 Service Marketing
7. MBAFT- 7607 Sales Promotion Management
8. MBAFT- 7608 Brand Management
9. MBAFT- 7609 Digital Marketing
10. MBAFT- 7610 Retailing Management
11. MBAFT- 7611 Marketing Channels
12. MBAFT- 7612 Marketing Analytics
13. MBAFT- 7613 Advanced Marketing Research
14. MBAFT- 7614 Global Marketing
15. MBAFT- 7615 Rural Marketing

**AREA - 7: OPERATIONS MANAGEMENT & DECISION SCIENCES**

1. MBAFT- 7701 Operations Strategy
2. MBAFT- 7702 Total Quality Management for Business Excellence
3. MBAFT- 7703 Integrated Management Systems
4. MBAFT- 7704 World Class Manufacturing
5. MBAFT- 7705 Technology, Innovation and New Product Management
6. MBAFT- 7706 Service Operations Management
7. MBAFT- 7707 Systems Optimization and Management Science
8. MBAFT- 7708 Predictive Analytics and Big Data
9. MBAFT- 7709 Supply Chain Analytics
10. MBAFT- 7710 Supply Chain Management
11. MBAFT- 7711 Sustainable Operations Management
12. MBAFT- 7712 Artificial Intelligence and Deep Learning

AREA - 8: ORGANIZATIONAL BEHAVIOR & HUMAN RESOURCE MANAGEMENT
1. MBAFT-7801 Human Resource Metrics & Analytics
2. MBAFT-7802 Performance Management and Training Intervention
3. MBAFT-7803 Managing Training, Learning and Development
4. MBAFT-7804 Talent Management
5. MBAFT-7805 Personal Power & Leadership through Asian Values
6. MBAFT-7806 Compensation and Rewards Management
7. MBAFT-7807 Managing Interpersonal and Group Processes
8. MBAFT-7808 Managing Diversity
9. MBAFT-7809 Counseling Skills for Managers
11. MBAFT-7811 Management of Industrial Relations
12. MBAFT-7812 Negotiation and Influence Skills
13. MBAFT-7813 Cross Cultural and Global Management
14. MBAFT-7814 Change and Intervention Strategies
15. MBAFT-7815 Leadership, Power and Politics

AREA – 9: STRATEGIC MANAGEMENT
1. MBAFT-7901 Strategic Capability Building and Innovation
2. MBAFT-7902 Strategic Management in Social Enterprises
3. MBAFT-7903 International Business Strategy
4. MBAFT-7904 Strategic Management of Startups
5. MBAFT-7905 Strategic Innovation in Health Care and Education
AREA - 10: CONTEMPORARY ISSUES*

1. MBAFT-70xx
2. MBAFT-70xx
3. MBAFT-70xx

*Before the beginning of every semester, a maximum number of two courses on contemporary issues may be announced by faculty members as optional courses to be offered during the coming semester under intimation to the University.

Selection of Elective Courses:
During Semester 3 of the program, in addition to the three compulsory papers, a student shall have to choose five elective courses from the list of optional papers announced at the beginning of Semester 3. Also, during Semester 4 of the program, in addition to the three compulsory papers, a student shall have to choose five elective courses from the list of optional papers announced at the beginning of the Semester 4.

Teaching:
Students will receive an input of 45 (class) contact hours in each paper. In addition, students are also required to undertake a variety of practical assignments and group work under the supervision of the faculty in every paper.
Assessment of Students’ Performance and Scheme of Examinations:

1. English shall be the medium of instruction and examination.
2. Written Examinations shall be conducted at the end of each Semester as per the Academic Calendar notified in advance.
3. Each course will carry 100 marks of which 30 marks shall be reserved for internal assessment and the remaining 70 marks for written examination to be held at the end of each semester.
4. The duration of the written examination for each paper shall be three hours.
   4.1 The internal assessment marks shall be based on factors such as:
   - Participation in case studies/ discussion, seminars and group activities;
   - Class tests, quizzes and mid-term tests;
   - Submission of written assignments, term papers and viva-voce;
   - Class attendance.
   - The weightage given to each of these factors shall be decided and announced at the beginning of the semester by the individual teacher responsible for the paper, and the marks obtained shall be made open to the students and also shown separately in the mark sheet.

4.2 The scheme of evaluation of paper MBAFT-6401: Project Study shall be as follows:
   - The Project Study shall commence from the third semester and report shall be submitted towards the end of the fourth semester.
   - The written part of the Project Study shall account for 50 marks and the viva-voce to be conducted by a duly constituted examination board for 50 marks.

Pass Percentage
The minimum marks for passing the examination for each semester shall be 45% in aggregate and a minimum of 40% marks in the semester-end examination in each theory paper and 40% in internal assessment marks of each paper.

In each paper, numeric scores will be awarded to both the evaluation components: internal assessment and final semester examination, internal assessment score will be based on the average of the numeric scores of the various components such as quizzes, assignments, project work, class participation, mid-semester exams, etc. The total score in a paper is obtained by adding the internal assessment marks and end semester examination marks.

Promotion Criteria
To be eligible for promotion to the Second Year (Part II) of the programme, a student must clear successfully at least 12 papers out of the 16 papers offered during the first year of the program.
programme. However, he/she will have to clear the remaining papers while studying in Part-II of the programme.

Eligibility for promotion to the Second Year of the programme will be contingent on the student successfully completing summer training.

**Re-Examination**

A candidate who has secured the minimum marks to pass in each paper but has not secured the minimum marks to pass in aggregate or has secured the minimum marks in aggregate but has not secured the minimum marks in the semester-end examination in any paper/s, may take re-examination in that/those paper/s in order to be able to secure the minimum marks prescribed to pass the semester any time during the span period of the programme.

A student shall be allowed to re-appear in any paper in any semester. However, the total number of attempts in a Paper shall not exceed four during the span period of the programme.

**Special Provision**: However, a special chance will be given to students who fail in Semester-4, Part II, to reappear in a maximum of two papers of Part II in the month of August/September immediately after the declaration of Final Semester Results so as to enable them to clear the remaining papers of Semester-4 before joining their respective jobs.

**Conversion of Marks into Grades:**

In each paper, numeric scores will be awarded to both the evaluation components: internal assessment and final semester examination, internal assessment score will be based on the average of the numeric scores of the various components such as quizzes, assignments, project work, class participation, mid-semester exams, etc. The total score in a paper is obtained by adding the internal assessment marks and the end semester examination marks. The total score obtained in a paper is converted to a letter grade in a ten-point grading scale as given below:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Numeric Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>10</td>
</tr>
<tr>
<td>A</td>
<td>9</td>
</tr>
<tr>
<td>A-</td>
<td>8</td>
</tr>
<tr>
<td>B+</td>
<td>7</td>
</tr>
<tr>
<td>B</td>
<td>6</td>
</tr>
<tr>
<td>B-</td>
<td>5</td>
</tr>
<tr>
<td>C+</td>
<td>4</td>
</tr>
<tr>
<td>C</td>
<td>3</td>
</tr>
<tr>
<td>D</td>
<td>2</td>
</tr>
<tr>
<td>F</td>
<td>1</td>
</tr>
</tbody>
</table>

Relative Grading Method based on Standard Deviation shall be used for the conversion of the numeric scores to the letter grades. The following points should be kept in mind while letter grades are awarded:

A. The normal cut-off for the F grade is less than 40% marks. The lower cut-off for the A+ grade should not be very low (preferably should be at least 80%). The score range for the remaining letter grades should form natural clusters.

B. Total of A category grades (A+, A and A-) should come under 25% of the total number of students in the class.

C. The distribution of grades should be approximately normal. While a slight deviation
from normality is expected and sometimes natural, major deviations, in either direction, should be remedied as far as possible.

D. When two or more faculty members teach in different sections of the same course, the grade distribution for internal assessment should not be *radically* different. The concerned faculty members must share and discuss the internal assessment grades before submitting to the Dean’s Office.

E. When a course is taught jointly by two or more faculty members, the grading should be done *jointly* by the teachers concerned.

F. In the relative grading system student grades are based on their distance from the mean score of the class. The standard deviation, mean and median are computed after creating the frequency distribution of the total scores (internal assessment marks plus end semester marks) so that cut-off points for each grade level can be determined. If the mean and median are similar in value then mean should be used for further computations of the cut-off of grades. If the mean and median are not similar then the median should be used for computation of cut-off of grades. The details are given below:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Marks Interval</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>Total Score &gt; Mean + 2.0 S.D</td>
</tr>
<tr>
<td>A</td>
<td>Mean +1.5 S.D &lt; Total Score &lt; Mean+2.0 S.D</td>
</tr>
<tr>
<td>A-</td>
<td>Mean +1.0 S.D &lt; Total Score &lt; Mean+1.5 S.D</td>
</tr>
<tr>
<td>B+</td>
<td>Mean +0.5 S.D &lt; Total Score &lt; Mean+1.0 S.D</td>
</tr>
<tr>
<td>B</td>
<td>Mean &lt; Total Score &lt; Mean+0.5 S.D</td>
</tr>
<tr>
<td>B-</td>
<td>Mean -0.5 S.D &lt; Total Score &lt; Mean</td>
</tr>
<tr>
<td>C+</td>
<td>Mean – 1.0 S.D &lt; Total Score &lt; Mean-0.5 S.D</td>
</tr>
<tr>
<td>C</td>
<td>Mean -1.5 S.D &lt; Total Score &lt; Mean-1.0 S.D</td>
</tr>
<tr>
<td>D</td>
<td>Mean -2.0 S.D &lt; Total Score &lt; Mean-1.5 S.D</td>
</tr>
<tr>
<td></td>
<td>or Total score &gt; 40 %</td>
</tr>
<tr>
<td>F</td>
<td>Total Score &lt; 40 %</td>

</tbody>
</table>

**Grade Points:**
As per the University Examination rule
Faculty of Management Studies, University of Delhi

CGPA Calculation:
As per the University Examination rule.

SGPA Calculation:
As per the University Examination rule.

Grand SGPA Calculation:
As per the University Examination rule.

Conversion of Grand CGPA into Marks
As notified by competent authority the formula for conversion of Grand CGPA into marks.

Division of Degree into Classes:
The degree shall be awarded to the successful students on the basis of the combined results of Part-I and Part-II in the first year and second year examinations as follows:

- Candidates securing 60% and above: First Division
- Candidates securing above 50% but below 60%: Second Division
- All others: Third Division

Attendance Requirement:
No candidate shall be considered to have pursued a regular course of study unless he/she is certified by the Dean, Faculty of Management Studies, University of Delhi, Delhi to have attended 75% of the total number of classroom sessions conducted in each semester during his/her course of study. Any student not complying with this requirement shall not be allowed to appear in the semester examinations. However, the Dean may condone the required percentage of attendance by not more than 10 per cent during a semester.

A student not allowed to appear in the preceding semester examinations due to a shortage of attendance, may appear in the papers of the preceding semester along with the papers of the current semester after making up the shortfall in the attendance. No remedial/ special classes shall be arranged by the Faculty for the purpose of making up the attendance shortfall.

Span Period:
The span period of the programme is four years from the date of registration in the programme. A student to be eligible for award of degree has to clear all the papers offered during the two-year programme within the span period.
IV: Course Wise Content:

COMPULSORY COURSES

SEMESTER - 1: MBAFT-6101 to MBAFT-6108

MBAFT-6101: ORGANIZATIONAL BEHAVIOUR

Course Objectives:

The objective of the course is to help students develop an understanding of the basic management concepts and behavioural processes in organizations which are important for them to adapt to the changing corporate environment.

Course Learning Outcomes:

1. Understanding the concept of organizational behavior
2. Developing an understanding of managerial functions, skills and roles
3. Strengthening the foundations of individual behavior with an understanding of human personality, perception, learning and emotions
4. Understanding the basic process of interpersonal relationship
5. Understanding how managers can use the models to enhance motivational levels of employees
6. Understand the concept of stress and learn to manage it
7. Understanding the behavioural approach to Managerial decision-making
8. Develop an understanding of teams and groups in organizations
9. Understanding the process of leadership
10. Understanding the various organization structures and their usefulness.

Contents:

Unit I: Introduction to Organizational Behaviour; Management Functions, Skills and Roles

Unit II: Introduction to Individual Behaviour: Personality: Determinants, Measurement, Different Traits; Perception: Process, Factors, Attribution Theory; Learning: Approaches, Measurement; Attitudes, Values and Emotions

Unit III: Interpersonal Relationship: Transactional Analysis: Ego States, Transactions, Life Positions, Stroke Analysis, Games Analysis; Johari Window

Unit IV: Motivation at Work: Introduction, Content Models of Motivation, Process Models of Motivation, Use of Motivation
Unit V: Leadership and followership: Introduction, Trait, Behavioural and Contingency Approaches to leadership, Transactional and Transformational leadership

Unit VI: Work teams and Groups: Introduction, Reasons for joining groups, Types of groups, Group Cohesiveness, Group Think and Risky Shift

Unit VIII: Stress and Well-being at work: Introduction, Sources, Reaction and

Unit IX: Organization Structure and Design:

Suggested Readings:

Facilitating the achievement of Course Learning Outcomes

The list of cases and other specific references including recent articles will be announced by the instructor at the time of launching the course.

**MBAFT-6102: DATA ANALYSIS AND DECISION TOOLS**
Course Objectives:

Data collection, presentation and analysis are important for objective decision making. Organizations today value the significance of data. Managers should possess the skills to extract actionable information from data and apply them. This introductory course will equip participants with such skills. The course has two components. In the first, basic statistical tools would be introduced. With the second component, participants would learn how to build decision models. Use of spreadsheet and package software will be extensive. On successful completion, participants would feel encouraged to use quantitative analysis in their work.

Course Learning Outcomes:

1. Know different sources of data
2. Ability to summarize and present data to a diverse audience
3. Understand and use sampling and inferential statistics
4. Ability to use spreadsheet software for data analysis and statistical model building
5. Learn management science tool linear and integer programming
6. Identify opportunities for application of management science tools
7. Ability to build and solve linear programming models using spreadsheet software.
8. Develop critical thinking and problem-solving skills.

Contents:

Unit I: Statistics and its importance for managers, Data collection, Quality of data, Descriptive statistics.

Unit IV: Inference from Samples: Sampling From a Population, Sampling Distribution of the Sample Mean, Central Limit Theorem, Point Estimation, Estimators and their properties. Confidence Interval for the Population mean and Proportion, Introduction to Hypothesis Testing, Type I and Type II Errors, Hypothesis testing the population mean and proportion using confidence intervals. Hypothesis testing for comparison of two populations. Analysis of Variance.

Unit V: Chi-square test, Sign test, Mann-Whitney U test, Wilcoxon signed-rank test, Kruskal Wallis test, Kolmogorov-Smirnov test.

Unit VI: Covariance and Correlation, Introduction to Regression: what is linear regression, fitting of the linear model, using Regression for prediction.

Unit VIII: Applications of LP in Marketing, Finance, Operations management.

Unit IX: Transportation problem and transshipment problem. Assignment problem.

Unit X: Integer programming: Model building, applications of models, binary integer programming problems, basics of solutions methods for solving integer programming problems.

Suggested Readings:

Teaching plan: A detailed teaching plan would be shared before the start of the semester.

### Course Objectives:

The objective of this course is to familiarize the students with the concepts and techniques used in Micro-Economic Theory and to develop managerial capabilities for effective decision-making in a variety of different business situations and market conditions. Managerial Economics provides the student with the basic tools to fundamentally deal with achieving a set of goals in a situation where resources are limited and choices must involve trade-offs, taking into account the external environment. This course provides the foundation for a variety of other courses, like finance, marketing, and strategy.

### Course Learning Outcomes:

1. Strengthening the foundations of the analytical approach to Managerial decision-making
2. Understanding consumer behavior
3. Understanding the production problem and how managers make input purchase decisions
4. Understanding the various market structure and how supply is determined in each.
5. Understanding the external environment, common information problems faced/created by managers

Contents:

Unit II: Theories of Demand: Preference, Utility Function, Indifference Curve, Revealed Preference Approach, Income and Substitution effects, Demand functions, Demand Forecasting; Managerial Applications.

Unit IV: Market Structure: Profit Maximization under Different Market Structures, Perfect Competition, Monopoly, Price Discrimination, Other Pricing Strategies of Firms, Monopolistic Competition, Game Theory, Models of Oligopoly --- Bertrand duopoly, Cournot duopoly

Suggested Readings:

MBAFT- 6104: ACCOUNTING FOR MANAGERS

Course Objectives:
The basic purpose of this course is to develop a strategic and policy perspective with respect to the principles of accounting and utilisation of accounting information for general purpose
decision making in an organisation. The emphasis is on core ideas and techniques with reinforced understanding using practical examples.

**Course Learning Outcomes:**

1. Understanding how accounting decisions affect real company practices.
2. Understand the concepts of Depreciation, Inventory valuation and the methods employed by Indian Companies.
3. Strengthening the foundations of the analytical approach to Managerial decision-making.
4. Understanding consumer behavior.
5. Understanding the production problem and how managers make input purchase decisions.
6. Understanding the various market structure and how supply is determined in each.
7. Understanding the external environment, common information problems faced/created by managers.

**Contents:**

**Unit I:** Accounting Theory: Concept, Importance, Scope, Generally Accepted Principles of Accounting, Indian Accounting Standards, IFRS, Harmonization of Accounting Standards, Preparation of Financial Statements, Corporate Balance Sheet – Terms, Contents, Format and Analysis.

**Unit II:** Depreciation Accounting and Inventory Valuation: Meaning and Techniques of Depreciation, Methods employed by Indian Companies, Inventory Valuation, Methods, Policies of Indian Companies.

**Unit III:** Presentation and Disclosure of Accounting Information: Presentation of Financial Position. Financial Statements of Companies. Analysis of Accounting Information: Financial Statement Analysis. Interpretation of Accounting information,

**Unit IV:** Cash Flow Statement, Preparing a statement of Cash Flows.

**Unit V:** Responsibility Accounting and Divisional Performance Measurement, Transfer Pricing: Definition, Objectives and Methods of Transfer Pricing, Recent developments in the field of Accounting.

**Suggested Readings:**

MBAFT-6105: MARKETING MANAGEMENT

Course Objective:

To introduce the students to the concepts, strategies and contemporary issues involved in the marketing of products and services.

Course Learning Outcomes:

1. Understanding the nature and scope of marketing
2. Develop an understanding of various marketing philosophies
3. Understanding the marketing mix and marketing environment
4. Understanding segmentation, targeting and positioning
5. Understanding consumer behavior and its application in marketing
6. Develop an understanding of decisions concerning 4 P’s – product, price, place and promotion
7. Understanding contemporary issues in marketing

Course Contents

Unit II: Marketing Environment: Environmental monitoring, Understanding the impact of Macro and Micro environment on Marketing, Global Marketing.

Unit IV: Strategic Marketing Planning Process: Competitor analysis, Marketing Warfare Strategies, Marketing Planning Process

Unit VI: Developing Pricing Strategies: Setting Price, Factors influencing Price Determination

Unit VII: Channels of Distribution: Designing Distribution Channels, Managing Conflicts and Controls in Channels, Retailing, Wholesaling and Logistics

Unit VIII: Marketing Communication: Role of Promotion in Marketing, Integrated Marketing Communication, Determining Promotional Mix, Advertising, Sales Promotion Public Relations, Personal Selling and Sales Management.

Unit VI: Trends in Marketing: Service Marketing, Social Media Marketing, Green Marketing, Customer Relationship Management, Rural marketing, other emerging trends.

**MBAFT- 6106: HUMAN RESOURCE MANAGEMENT**

**Course Objective:**

The objective of the course is to sensitize students to the systems and strategies in managing people professionally in view of the rapidly evolving aspirations of individuals, and changing business contexts. The course is designed to familiarize participants with human resource policies and practices that they need to know regardless of their field of managerial functions. The course highlights the need for well-designed human resource policies that promote...
employee motivation and performance, and in achieving organizational objectives. The course will provide basic concepts, techniques, and practices of human resource management in diverse contexts.

**Course Content:**

**Module 1:** Foundations and Principles of Managing People in Organizations: Concepts and Perspectives; Contemporary issues and challenges in managing human resources;

**Module 2:** Job Analysis; Human Resource Planning: Demand and Supply Forecasting, Downsizing and Retention; Talent Acquisition: Recruitment, Selection and Induction; Performance Management: Systems and Strategies; Learning, Training and Development: Process and methods; Compensation and Rewards Management;

**Module 3:** Industrial Relations: Dynamics of Employer, Employee and the State; Trade Unions: Past, present and the future; Industrial Harmony: Workers’ Participation, Collective Bargaining, Grievance, Discipline; Dispute Resolution and Conflict Management; Employee Engagement; International Dimensions of HRM.

**Learning Outcome:**

- Participants will be able to understand the importance of managing human resources professionally, in view of the constantly changing aspirations of individuals, the business context, and organizational dynamics in the health sector;
- Participants will be able to understand the foundations of managing human resources in organizations, in terms of systems, strategies and practices;
- Participants will be able to appreciate the need for well-designed HR policies that enhance employee motivation and performance;
- Participants will be able to learn the tools and techniques of human resource management systems;
- The entire course is based on case studies and students will be able to understand the dynamics of managing people from real-world examples.

**Suggested Readings**

The list of cases and other specific references including recent articles will be announced by the instructor at the time of launching the course.

**MBAFT-6107: BUSINESS COMMUNICATION**

**Course Objectives:**

The aim of the course is to develop skills and competencies in participants to be able to communicate effectively through written, oral and social medium. This course will make students conversant with the basic forms, formats and techniques of business writing so that they would be thoroughly prepared to communicate effectively in all contexts. Sensitivity towards cross-cultural communication will be developed with familiarity with global business
etiquette and protocols. The pedagogical focus of the course will be lecture cum workshop-based format with emphasis on practice and skills development.

Course Learning Outcomes:

1. Understanding the role of communication in the organizational and Global Context
2. Understanding the basics of effective written and verbal communication
3. Understanding the theoretical models of communication and development in communication research
4. Analyzing one’s own communication style in different contexts and mediums
5. Exposure and training of technical writing, responsibilities of a communicator, Ethical Issues and Legal Issues

Contents:

Unit I: Communication in Organizations
Introduction to Business Environment and Communication, Basics of Communication (7Cs), Corporate Communication, Listening Skills, Verbal and Non-Verbal Skills and Presentation Skills, Legal issues in Communication

Unit II: Written Communication
Planning and executing different types of messages, Writing reports, proposals and Business plans, Improving personal writing skills

Unit III: Interpersonal Communication
Communicating in teams, Negotiation Skills, Communication skills during a conflict, Mentoring and Appraisals, Communication in Social Media and Digital Communication

Unit IV: Cross Cultural Communication
Theoretical Framework of Cross-Cultural Communication, Communication across cultures through different mediums, Business Etiquettes across cultures

Unit V: Career management and communication
Resume writing and cover letters, Group Discussions and Interviews, Communication during Exit Interviews, Ethics and Communication

Suggested Readings:

### V. Career Management and Communication

Unit IV has a crucial contribution to the life stage of the student enrolled in the Full-Time MBA program as many of them would be without work experience. It will help students learn the important aspects of a well-constructed resume that would align with the prevailing style in the contemporary business context. They would be able to understand the strengths and weaknesses during interviews and G.Ds. The session would also create awareness regarding the ethical issues involved in resume writing and interviews.

Apart from the core text recommended for the course, related articles, Case-lets and Videos would be shared.

**Topics**
1. Resume writing and cover letters
2. Group Discussions and Interviews
3. Communication during Exit Interviews
4. Ethics and Communication

**Class Exercises**

### MBAFT-6108: INFORMATION TECHNOLOGY MANAGEMENT

**Course Objectives:**

The objective of this course is to develop micro-level individual competency amongst the participants with regard to contemporary Information Technology Tools and to develop an understanding of the data processing systems existing in organizations.
Course Learning Outcomes:

1. Developing an appreciation of IT in General and Elements of IT Systems Setup for organizations and discussions on the emerging information technology
2. Familiarizing the students with the Indian IT Industry and the latest developments in the same
3. Help students appreciate the nuances of Data Processing Systems for organizations.
4. Providing hands-on dexterity to the students with regard to an executive software suite
5. Understanding the basics of networking and integrated information systems

Course Contents:

Unit I: Computers: An Introduction; Computers in Business Organizations; Generations of Computers and Computer Languages; Personal Computers in Business; Elements of Information Technology: Hardware, Software, Data, Telecommunications and People; Planning an Information Technology set up for an organization. Discussion on emerging technologies such as Cloud, Social Media, IoT, Robotics etc.

Unit II: Indian Computing Environment: Growth of IT Sector in India; Trends in IT and ITeSs sectors; Applications of information technology in business, government and service organizations. E-Commerce and E-Governance. Latest developments in IT applications. E-Governance as a social transformational tool

Unit III: Modes of Data Processing: Computer Software Systems; Software Development Process; Data Design & Report Design; Data Files - Types/Organizations; Master & Transaction Files; Relevance of Data Base; Software/Program Development Cycle; Flow Charting: Input-Process-Output Analysis; Report Generation; Programming Concepts; Use of Data Files in Programming. Management of Data Processing Systems in Organizations.

Unit IV: PC-Software Packages: An Introduction - Operating System and Windows; Text Processing Software. Introduction to spreadsheet software; Creation of spreadsheet applications; Range, Formulas, Functions, Data Base Functions in spreadsheet; Graphics on Spreadsheet. Introduction to a micro data base manager. Presentation Graphics - Creating a Presentation on a PC.

SEMESTER - 2: MBAFT-6201 to MBAFT-6208

MBAFT-6201: ORGANIZATION EFFECTIVENESS AND CHANGE

Course Objectives:

The purpose of this course is to familiarize students with the basic organizational processes which enable them to understand to dynamics of organizational life thereby leading to organizational effectiveness and change.

Course Learning Outcomes:

1. Understanding the concept of organizational change and development
2. Developing an understanding of different models of change
3. Familiarization with the concept of organization climate and culture
4. Understanding how managers manage conflict & develop collaborative behavior
5. Develop an understanding of intergroup behavior and negotiation
6. Understanding the concept of power and politics in organizations and learn to manage it
7. Understanding how managers can use the models to enhance creativity levels of employees both at the individual and organizational level
8. Understanding the basic concept of managing gender issues in organizations
9. Develop an understanding of cross-cultural management
10. Understand the evolution and development of learning organization

Contents:

Unit I: Introduction to concepts of Organizational Change and Development: Forces, Resistance and Management of Change; Models of Change

Unit II: Organizational Climate and Culture: Introduction; Evolution; Determinants; and Dimensions

Unit III: Management of Conflict & Negotiations: Sources, Reactions and Management of Conflict; Approaches to Negotiation
Unit IV: Intergroup Behaviour and Negotiation: Understanding Competition and Collaboration, Approaches to negotiation

Unit V: Power and Politics in Organization: Introduction, Bases of Power, Power and Political tactics, Sources of Political Behaviour

Unit VI: Management of Creativity and Innovation: Individual and Organizational Creativity, Creative Blocks, Overcoming Blocks, Organizational Innovation

Unit VII: Understanding Gender Issues in management: Gender stereotypes, Women in Management, Individual and Organizational strategies to manage Gender Issues in Organizations

Unit VIII: Cross-Cultural Management; Learning Organizations

Suggested Readings:

**Facilitating the achievement of Course Learning Outcomes**

<td>Case analysis and quiz</td>
</tr>
</tbody>
</table>
II. Organizational Climate and Culture
Discussions and presentations on the understanding of organization culture and climate with its measurement.
Case, exercise and quiz

III. Management of Conflict & Collaboration
Presentation and discussion on types, sources and management of conflict with a focus on collaborative behaviour.
Exercise and cases

IV. Intergroup Behaviour and Negotiation
Understanding the importance of intergroup behaviour in organizations through simulation and analysis of the role in negotiation.
Simulation cases and quiz

V. Power and Politics in Organization
Discussions and presentations on the role and importance of power and politics in business organization
Exercise, cases and quiz

VI. Management of Creativity and Innovation
Measuring individual creativity and case analysis to understand the importance of creativity and innovation in organizational life.
Exercise, cases and quiz

VII. Understanding Gender Issues in management
Exercise and situation analysis on identifying and managing gender issues in organizations.
Exercise, cases and quiz

VIII. Cross-Cultural Management; Learning Organizations
Case on cross cultural management and learning organization and discussion and presentation.
Exercise, cases and quiz

The list of cases and other specific references including recent articles will be announced by the instructor at the time of launching the course.

MBAFT-6202: DECISION MODELLING AND OPTIMIZATION

Course Objectives:
Managers need to take real-time decisions in complex environments. Quantitative tools based on data are proving to be indispensable for good decision making. In this course, the analytical model building approach of management science would be discussed. Students would be introduced to important techniques like optimization and simulation. The course will encourage the spread-sheet model building of business problems. Practical examples and case studies would be an integral part of teaching-learning pedagogy.
Course Learning Outcomes:

1. Understand the benefits of data-driven decision making
2. Learn the model building approach of management science in improving managerial decision making
3. Ability to identify decision problems amenable for management science approach to finding a solution
4. Develop skills to use important prescriptive analytics tools
5. Develop skills for spreadsheet model building and use of relevant software packages.

Contents:

Unit I: Model building for optimization. Distribution and network models: Shortest route and other routing problems, maximal flow problem

Unit II: Multiple criteria decision models: Introduction of goal programming, modelling and solution

Unit III: Waiting line models: Introduction to theory of queues, standard terminologies, pure birth-and-death model, M/M/1 and M/M/c models

Unit IV: Simulation: Types of simulation, Monte-Carlo simulation method, Verification and validation.

Unit V: Decision making under uncertainty: Decision criteria, decision tree, Value of Information, Risk profile

Unit VI: Project scheduling: Scheduling with known activity times, time-cost trade-offs, Scheduling with uncertain activity times

Unit VII: Markov processes: Introduction to stochastic process, terminologies, Markov process, transition probabilities, simple business applications

Unit VIII: Theory of games, two-person zero-sum, constant-sum and non-constant sum games, application of linear programming in finding equilibrium solutions.

Suggested Readings:

MBAFT-6203: ECONOMIC ENVIRONMENT OF BUSINESS

Course Objectives:

This course introduces students to the basics of Macroeconomic theory and International Economics. The objective of this course is to familiarize students with the fundamentals of macroeconomics and to emphasize the importance of assessing the external macro environment by businesses in order to survive and prosper. The course introduces students to the basic macroeconomic variables, like GDP, inflation and unemployment and the basic frameworks to understand how policy choices affect these variables. Understanding the role of institutions, like the Reserve Bank of India, and understanding how international trade works are some of the other objectives of the course.

Course Learning Outcomes:

1. Understanding the relevance of the basic macroeconomic variables and their measurement
2. Understanding economic growth and its determinants
3. Understanding the various medium-run and short-run macro-frameworks
4. Analyzing policies and the role of institutions
5. Understanding the basics of international economics

Contents:

Unit I: Introduction, Key Macroeconomic Variables and their Relevance to Business, National Accounts, Measuring the State of the Economy, Problems of GDP Measurements, Inflation, Inequality, and Unemployment – Measurement and Issues

Unit II: Economic Growth, Growth around the World, A Model of Production, Total Factor Productivity, The Solow Model, Balanced Growth Path, Steady State, Transition Dynamics, Lessons for Developed and Developing Countries,

Unit V: Open Economy, Theories of Trade, Nominal and Real Exchange Rates, Balance of Payment, Capital Account, Current Account, Exchange Rate Regimes, Capital Account Convertibility, Mundell Fleming Framework in difference Exchange Rate Regimes

MBAFT-6204: CORPORATE FINANCE

Course Objectives:
The course is designed to provide an understanding of the essential elements of financial management and the financial environment in which the business firm operates. The paper will examine the objective of shareholder wealth maximization which encompasses much of modern corporate finance and its implication for decision making in the present context.

Course Learning Outcomes:

1. Understanding the evolution and growth of the finance function. The objective of the firm – Shareholder wealth maximization.
2. Make Strategic Investment decisions with the help of NPV, IRR and PI techniques. Calculating and interpreting the cost of capital for companies.
3. Financing options available to firms, Tradeoff between debt and equity, Criteria for deciding the optimal financing mix.
4. How do managers decide how much to reinvest and how much to return to owners as dividends?
5. Understand the concept of working capital and the working capital policies to manage cash and account receivable for a company.

### MBAFT-6205: MANAGEMENT ACCOUNTING

**Course Objectives:**

To gain knowledge of use of costing data for decision-making and control, and emerging modern cost management concepts. This course will focus on providing skills in contemporary Management Accounting methodologies and issues. The teaching environment will cover lectures, case discussions and discussion of project assignments.

**Course Learning Outcomes:**

1. Strengthening the foundations of the analytical approach to Managerial decision-making
2. Understanding cost behavior
3. Understanding how managers make a variety of decisions
4. Understanding the relevance of budgeting and computing variances to undertake performance evaluation
5. Understanding Activity Based Cost Management vs. Traditional Cost Management

**Contents:**

**Unit I:** Cost concepts in Accounting: Evolution of Management Accounting & Current Issues, Overview of Management Accounting, Classification of costs, Methods of costing, Reconciliation and Integration between Financial and Cost Accounts; Material Cost and Control, Labour Cost and Control, Overhead Cost and

**MBAFT-6206: PRODUCTION & OPERATIONS MANAGEMENT**

Course objectives:
This course is designed to help the students understand the role of operations in improving the efficiency of an organization including both manufacturing and service one and also help them appreciate the linkage of operations with corporate strategy and other functional domains including marketing and finance. It would help them understand the business problems relating to operations and equip them with the application of appropriate tools and techniques for addressing the same. The course would also seek to familiarize the students with the contemporary challenges being faced by the organizations in the domain of operations and supply chain.

**Course Learning Outcomes:**

1. Understand the role of operations in both manufacturing and service organizations and the significance of operations strategy in the overall business.
2. Understand the importance of facilities location decision in the whole supply chain in globalized operations and learn the tools relating to facilities location.
3. Understand different types of production processes and facility layout suitable for manufacturing different categories of products and how different processes could be analyzed with the help of process flow charts.
4. Understand the elemental processes involved in designing a product and a service.
5. Develop a thorough understanding of a range of inventory models available as also the suitability of a particular inventory model in a particular context.
6. Understand suitable production strategies to be adopted for meeting the varying level of demand depending on the type of product and nature of demand and also an appropriate volume of input materials to be procured at a particular point of time depending on the production schedule and available inventory.
7. Learn different quality tools and the tools of statistical process control for analyzing a process in terms of quality and also develop an understanding of six sigma quality.
8. Learn how a process could be run with minimal resources without sacrificing service and also with minimum wastes generated.
9. Learn how process output could be improved by committing extra inputs to bottleneck resource.

**Contents:**

**Unit II:** Facilities location: Globalization of operations, factors affecting location decisions, location planning methods, linkage with supply chain network design decisions.

**Unit III:** Design of production process and facility layout, Process design and analysis.

**Unit IV:** Design of products and services: Process of product and service design, tools.

**Unit V:** Inventory Management: Deterministic Models, Probabilistic Models: Multi-period and Single period (News vendor) models, Selective Inventory Models.
Unit VI: Aggregate Production Planning (APP), Master production schedule (MPS), Materials requirements planning (MRP).

Unit VIII: Just-in-time, Lean operations and Toyota Production System

Unit IX: Theory of Constraints, Critical chain project management

| III. | Understand different types of production processes and facility layout suitable for manufacturing different categories of products and how different processes could be analyzed with the help of process flow charts. | Relevant examples and exercises would be introduced to explain production processes and facility layout. In addition, small cases would be handled to cover process analysis. | Quiz |
| IV | Understand the elemental processes involved in designing a product and a service. | Relevant examples and exercises would be introduced to explain product and service design. | Quiz |
| V | Develop a thorough understanding on a range of inventory models available as also the suitability of a particular inventory model in a particular context. | Relevant exercises and small cases would be introduced to discuss different types of inventory models. | Written test |
| VI | Understand suitable production strategies to be adopted for meeting varying level of demand depending on the type of product and nature of demand and also an appropriate volume of input materials to be procured at a particular point of time depending on production schedule and available inventory. | Exercises and small cases would be handled to discuss the concepts and tools of aggregate planning and MRP. | Exercises and case study analysis |
| VII | Learn different quality tools and the tools of statistical process control for analyzing a process in terms of quality and also develop an understanding about six sigma quality. | Exercises and small cases would be introduced to discuss the concepts and tools of quality, SPC, process capability and six sigma. | Exercises |
| VIII | Learn how a process could be run with minimal resources | A case would be introduced to facilitate the learning of JIT | Minor |
without sacrificing service and also with minimum wastes generated. and lean operations. project

IX

Learn how process output could be improved by committing extra inputs to bottleneck resource. Concepts would be discussed through lecture and real-life examples. Relevant exercises would also be introduced. Minor project

MBAFT- 6207: MARKETING RESEARCH

Course Objectives:
To provide an understanding of fundamental concepts in the field of marketing research and to equip the students with research tools to conduct research and analysis for effective decision making.

Course Learning Objectives:
1. Understanding the nature and scope of marketing research
2. Develop an understanding of different types of research design and their applicability
3. Understanding different types of scales that can be used by a researcher
4. Understanding different methods of data collection, their advantages and limitations
5. Develop an understanding of sampling techniques
6. Learning about coding, editing and presentation of data
7. Understanding the process of hypotheses testing
8. Learning various univariate and multivariable data analysis techniques and their application in marketing research
9. Develop an understanding of how to write a report
10. Understanding various ethical issues in marketing research

Contents:

Unit I: Introduction: Nature and scope of Marketing Research, Marketing Research Process, Formulation of research problem; Research Design: Exploratory, Descriptive and Conclusive research

Unit II: Scaling techniques: Comparative and Non-Comparative Scaling Techniques, Reliability and Validity of Scales

Unit III: Data Collection Methods: primary and Secondary Data, Sources of Secondary Data, Conducting review of literature; Qualitative Research Tools: Depth Interviews, focus
groups and projective techniques, Observation method, Survey and Questionnaire Design: Form and layout, Pilot testing

**Unit IV**: Sample Design and Field Work: Probability and Non-Probability Sampling Techniques, Sample Size determination, Data coding and data preparation, tabulation, Graphical presentation, sampling and non-sampling errors

**Unit V**: Hypothesis Testing and Data Analysis: Concepts, Parameter and Non-parametric Testing, Use of statistical Software; Univariate and Multivariate data analyses techniques

**Unit VI**: Report Writing: Types of report, Format of writing the report

**Unit VII**: Marketing Research Applications and Ethical Considerations: Consumer research, attitude measurement and scaling techniques; Product research; Advertising research; Marketing and sales forecasting; Sales analysis, Ethical issues in Marketing Research

**Suggested Readings:**

**Facilitating the achievement of Course Learning Outcomes**

**MBAFT-6208: MANAGEMENT OF INFORMATION SYSTEMS**

**Course Objectives:**

This course has been designed to develop a macro-level perspective of the information technology and its potential to help organizations create sustainable competitive advantage in
respective industries. This should also help the participants appreciate the significance of IT investment decisions made by organizations.

Course Learning Outcomes:

1. Developing a macro level understanding among the students with regard to the exploitation of information technology by organizations.
2. Discuss various types of Computer Based Information Systems and their relevance for organizations.
3. Develop an understanding of role of IT for competitive advantage.
4. Discuss the importance of system development and system life cycle.
5. Understand the role of IT Architecture in making IT investments.

Contents:

Unit I: Emerging Technology Issues and Data Processing in Organizations; Introduction to Information Systems; Shift in information system thinking. Decision Making and MIS. Cost and Value of Information.

Unit III: Discussion on using IT for competitive advantage; Role of Internet and emerging technologies; IT enabled services; Seamless organizations; Virtual corporations; Web enabled computing as a strategic tool; Outsourcing as a strategic alternative. International Information Systems.Interorganizational Information Systems.

Unit IV: Structured Systems Analysis; System Development; System Development Life Cycle. Discussion on ERP, CRM and SCM.

Unit V: Planning and Building IT Architecture; Information Infrastructure; Legal Issues and National Information Infrastructure. IT Leadership & IS Strategic Planning; IS Strategy and Effects of IT on Competition. Re-engineering Work Processes for IT application. Cases on strategic use of IT in different industries.

SEMESTER - 3: MBAFT-6301 to MBAFT-6303

MBAFT-6301: BUSINESS ETHICS AND SUSTAINABILITY

Course Objectives:
The course seeks to bridge the gap between the ethical behavior of the individual and the ethical challenges posed by organized business activity in the global marketplace. It further seeks to educate students about the importance of sustainability and its implications with respect to survival of the planet, community and organization. The course aims to sensitize participants towards consequences of their decisions involving ethics. The course does not provide solutions to critical dilemmas, but encourages critical ethical thinking and decision-making that is aligned with law of the land, sustainability and morality.

Course Learning Outcomes:

1. The course seeks to develop an understanding of philosophical frameworks that shape sense of morality while doing business in a cross-cultural global business environment.
2. It sensitizes participants towards negative outcomes of unethical practices at the level of organization, community, environment and self.
3. Facilitates the development of critical thinking to solve ethical dilemmas in work life.
4. Understand how functions like marketing, finance, human resources and other areas of business often engage in unethical practices while conducting business.
5. Learning to build an ethical work culture in an organization through an ethical policy, its implementation.
6. Understanding the concept of sustainability in relation to the functioning of business organizations.

Contents:

Unit I: Conceptual framework: Ethical considerations in business and the costs of being unethical. What is the purpose of business: profit maximization versus corporate social responsibility.

Unit II: Philosophical frameworks for ethical decisions: Western Teleological, Deontological and Modern theories; Islam and business ethics; Chinese and Confucian ethics of business; Indian ethics.

Unit III: Workplace ethics in human resources management: hiring, promotions, discipline, discharge and discrimination related to gender, caste and class. Sexual harassment.

Unit IV: Mergers & Acquisitions: reorganization, rationalization & redundancy. Labor and unions tactics that are not ethical but practiced by organizations frequently.
Unit V: Marketing ethics: price, packaging & labeling problems; issues related to ethical advertising and communication; consumer protection and product safety.

Unit VI: Financial issues: insider trading, transparent financial statements and ethical issues related to disclosers.

Unit VII: Ethical choices facing employees: obligation & loyalty to the firm, abuse of official position, bribes & kickbacks, gifts & entertainment. Whistle blowing concept and implementation of ethical policy in the organization.

Unit VIII: Meaning of sustainability in relation to business organizations. Issues related to saving the environment, conserving resources, pollution and carbon emission and safe guarding communities and biodiversity when engaged in commercial activities.

Unit IX: United Nations Agenda for Sustainable Development for 2030 and, the Seventeen Sustainable Development Goals (SDGs) to create an economy that is simultaneously prosperous, equitable, and environmentally sustainable, The concept of Carbon foot prints of corporations. Methods of sustainability audit – Triple Bottom Line and Corporate Environment Responsibility (CER)

MBAFT- 6302: STRATEGIC ANALYSIS

Course Objectives:

The course is designed to cover the fundamentals of strategic analysis. It aims to provide a holistic perspective of an enterprise, critical from the point of determining the strategic direction and scope of an organisation.

Course Learning Outcomes:

1. Understand the concept of strategy formulation in various organisational contexts
2. Be able to analyse the broad macro and industry specific external environment
3. Gain the ability to analyse the internal resource and capability environment of the organisation
4. Understand how organizations can try to achieve sustainable competitive advantage
5. Comprehend the distinction between different kinds of generic strategies.

Contents:
Unit I: Strategy as the science and art of creating value: Goals and means, deliberate versus emergent strategies, Influence of stakeholders, Strategic choices, Levels of strategy, Vision and mission, Strategic fit, leverage and stretch, The Balanced Scorecard

Unit II: Analysis of the External Environment: Demand and competitor analysis, Macro models and industry models, Industry attractiveness, Defining industries, Segmentation Analysis, Strategic Groups

Unit III: Organisational resources and capabilities: Types and nature of resources and capabilities, transforming resources into capabilities, Identifying and appraising resource and capabilities, Gap analysis

Unit IV: Competitive Advantage: The notion of core competence, Sustainability of competitive advantage, The role of innovation, Competencies as barriers to change, Value Chain analysis

Unit V: Generic Strategies: Cost based versus differentiation-based strategies, Cost leadership and focus, Sources of cost advantage, Broad differentiation versus focus, Types of differentiation, Blue ocean strategies, Product and market diversification strategies, Portfolio models, Industry versus product life cycle, Static versus Dynamic Competitive Advantage

Suggested Readings:

The list of cases and other relevant references including the latest articles and papers will be announced by the teacher every year at the time of starting the course.

**MBAFT-6303: PROJECT STUDY**

The Project Study shall commence from the beginning of the third semester and report shall be submitted at the end of the third semester. The written part of the Project Study shall account for 50 marks and the viva-voce to be conducted by a duly constituted examination board for 50 marks.

**SEMESTER - 4: MBAFT-6401 to MBAFT-6403**

**MBAFT-6401: LEGAL ENVIRONMENT OF BUSINESS**

Course Objectives:
The objective of this course is to provide students with increased knowledge concerning important legal issues in business, so that they, as managers able to take decisions which are in accordance with the law of the land.

The course aims to bring jurisprudence to the forefront by engaging students in thoughtful and critical analysis about the law. This course resolves to provide the students with an understanding about the basic nature of law, how it works, how it is used to settle disputes and how it affects business decision making.

Greater knowledge of legal issues in business will enable the students to be an active partner in legal aspects of decision making. The students will be better equipped to avoid the legal issues before they occur and control and manage legal problems which do emerge more effectively.

**Course Learning Outcomes:**

1. The course will help students recognize when one has a legal issue in various business settings and transactions.
2. The course will enhance student growth in critical thinking and problem solving regarding legal issues by reviewing factual situations and applying sound legal reasoning to reach a conclusion.
3. It will help students acquire a knowledge of basic legal terminology
4. The course will strengthen written and oral communication through several written assignments and classroom presentations.

**Contents:**

**Unit I: Business Management and Jurisprudence**
Philosophical context of the law, general principles and application of jurisprudence.

**Unit II: Commercial Laws**
Essential elements of mercantile law

**Unit III: Banking & Insurance Law**
Introduction, Control and Regulation of Banking and Insurance in India

The Banking Regulation Act, 1949; Insurance Act, 1938 (Amendment Act 2015)

Foreign Exchange Management Act, 1999; Introduction, Definitions, Regulation and Management of Foreign Exchange

**Unit IV: Intellectual Property Rights**

**MBAFT-6403: GLOBAL BUSINESS MANAGEMENT**

**Course Objectives:**
The course focuses on key global business environmental factors and introduces to the students the nature of international business and the internationalised firm. It will help the students to understand the factors contributing to the diverse and complex international business environment and the influence of global competitive forces and the resources needed to compete effectively in global markets.

**Course Learning Outcomes:**

1. Understanding the Global Business Environment and the development of firms with international operations, including Multinational Enterprises (MNEs); multinational firms in a globalised world
2. Develop an understanding of Global Financial Institutions, Regional Trade Associations, Institutions of the Multilateral Trading System
3. Understanding how international business is affected by the many different types of environments (i.e. economic, political, social, cultural, financial, technological) in which it operates; Cultural differences and their effects on international business
4. Strengthening the understanding of foreign exchange markets;
5. Understanding international trade policy and the World Trade Organisation (WTO); regional economic integration
6. Understanding financing international transactions and settlement of international disputes
7. Understanding innovation, technology diffusion and digital divide
8. Studying Country Risk and Political risk

**Contents:**

**Unit I: Introduction to Global Business**

**Unit II: Global Business Environment**

Political Economy of International Business, Economic and Political Systems, Legal Environment, Cultural Environment, Ethics and CSR in International Business.

**Unit III: Global Trading Environment**
Theories of International Trade, Political Economy of International Trade – Tariff and Non-tariff Barriers, Global Regulation of International Trade – WTO, UNCTAD; Regional Economic Interaction – theory, stages, working

**Unit IV: Global Investment Environment**

Theories of Foreign Direct Investment, Traditional and Modern theories of FDI, Modes of FDI - Greenfield, Mergers and Acquisitions and Brownfield Investment, Motives of FDI, FDI contrasted with FPI

**Unit V: Strategy and Structure of Global Business**

Modes of Foreign Market Entry, Country Evaluation and Selection, Entry and Expansion Strategies, Direct Investment versus Collaborative Arrangements, Organizational Structure in the global context, Global Competitiveness; Technology and Innovation.

ELECTIVE COURSES

AREA-1: CULTURE, PHILOSOPHY AND MANAGEMENT

(MBAFT-7101 to MBAFT-7103)

MBAFT-7101: CULTURAL, PHILOSOPHICAL AND SPIRITUAL FOUNDATIONS OF MANAGEMENT

Course Objectives:
The course is designed to persuade management students to study philosophy, and convincing them that a study of philosophy is relevant for them in a business environment underscored by uncertainty.

Course Learning Outcomes:
1. The students will be able to understand the cultural and philosophical foundations of management education.
2. The students will be exposed to the contributions made by major eastern and western philosophers.
3. The students will be exposed to an analysis of values such as trust, justice, honesty, integrity, fairness, prudence, respect, competition, professionalism.
4. The students will be exposed to Enlightened Management Practices through literature.
5. The students will understand the role of cultural context of human understanding and its implications in organizations.

Contents:
Unit I: Introduction to Eastern and Western philosophies on education and understanding human nature, Philosophical foundations of management, Application of Trusteeship theory in management.

Unit II: The psychological foundations of values and its impact on behavior, Morality and business, Consciousness and capitalism, Theory of Justice and management. Doctrine of karma and Kant’s postulate of morality.

Unit III: Analysis of the theories of trust, justice, honesty, integrity, fairness, prudence, respect, competition, professionalism and examining its contemporary relevance for organizational development and growth.

Unit IV: Indian philosophy and its ontology and epistemology, Yoga and mental health, Understanding bio-sphere and bio-energy, Sri Aurobindo’s Integral Yoga and levels of being, Causation theories in Indian philosophy, Four principles of Mahatma Gandhi.

Unit V: Insights from Indian and Western literature on Management, Insights from folklores and folktales, Insights on enlightened management practices from fictions, understanding enlightened management practices in cultural context, cultural intelligence and organizational performance.

Suggested Readings:

5. Hume, D. An enquiry concerning the principles of morals.

3. The students will be exposed to the analyses of theories of trust, justice, fairness, honest and integrity. Cases and small group discussions Case analysis and assignment

4. The students will understand the fundamentals of Indian philosophy, particularly, causation theories; in the context of management researches. Seminar, discussions and cases Case analysis and assignment

5. The students will be able to draw management insights from literature, folk tales, folk lores and fictions. Seminar, discussions and cases Case analysis and assignment

MBAFT-7102: BUSINESS TRANSFORMATION THROUGH SPIRITUAL LEADERSHIP

Course Objectives:

Today’s workplace is battling with an economic downturn, diversity issues, ethical and moral dilemmas, and skepticism about the integrity of leaders and managers despite the visionary statements and an empire built on defined core values. Employees are starving for upright leaders/managers who exhibit authenticity and sincerity, and who inspire and guide work life leading to complete organizational transformation. The objective of the course is to make the students understand the role of spirituality in business transformation and to explore how the emerging context can serve as a panacea for building inclusive sustainable businesses models.

Course Learning Outcomes:
1. To expose the students to a leadership model that reflects something more meaningful from within to create an environment of faith and love where employees feel that they are a part of something substantial and provides meaning.
2. To expose the students how to create a culture of inspiration and aspiration at workplace for employee engagement.
3. To expose and make the students understand Spiritual Leadership under the rubric of Organizational Transformation as an extension of traditional Organizational Development.
4. To expose students to the various theories of Spiritual Leadership.
5. To expose the students to the tools and techniques of developing Spiritual Excellence Model.

Contents:

**Unit I**: Introduction to history of leadership, Charismatic leadership, Transformational leadership, Authentic leadership, Servant leadership, Spiritual leadership, Integral leadership styles, Level 5 Integral Leadership Styles.

**Unit II**: Energy a missing concept in organizational culture, Concept of energy at workplace and creating energy at workplace, Energy based organizational culture.

**Unit III**: Foundations of organizational development, Various theories of organizational development, Focus on internal and external orientation, Role of spirituality in strength based employee engagement, purpose driven approach to work, virtue based management practices.

**Unit IV**: Role of greed and malaise of modern organizations, Different models of management, Spirituality – perceptions and definitions, Workplace spirituality, Spirituality and organizational performance, models of organizational transformation, spirituality and organizational transformation, Role of Emotions in organizational transformation, Intrinsic motivation and spirituality, Theories of spiritual leadership through vision, hope faith, and altruistic love.

**Unit V**: Different Business Excellence Models, Linkage between organizational transformation and development interventions, Spiritual excellence model for employee wellbeing and organizational excellence, Strategic scorecard business model of spiritual leadership.

### MBAFT-7103: SPIRITUALLY AT WORKPLACE

**Course Objectives:**
This course will be conducted in Seminar mode and help the students understand, review and explore the ways to integrate spirituality into organizational structure and processes. The explorations will be discussed at four levels of analysis: individual, group, organizational, and societal. Topics covered will work as a spiritual path, leadership and spirituality, spirituality in teams, and systemic organizational approaches to creating enlightened organizations.

Course Learning Outcomes:

1. The students will learn to systematically explore and map the field from different perspectives referring to different disciplines and spiritual and wisdom traditions.
2. Students will be exposed to management theory on integrating spirituality and organizational leadership and its application to various spheres of management activities and practice.
3. This seminar will inevitably touch on the lived experience of each participant’s quest for full personal integration in his/her business and organizational activities.
4. Students will be able to understand how the spiritual traditions conceive of “vocation” or “calling” as an outward manifestation of the inner spiritual journey.
5. Understand under what conditions business leadership fulfils this expression of calling.

Contents:

Unit I: Introduction to Spirituality at workplace, Different approaches to understand spirituality at workplace, Perspectives from wisdom traditions, monasticism and organizational leadership, Understanding creating an inclusive organization through spirituality.

Unit II: Analyzing various theories of organizational structure and design; Business need challenges and the need for self-integration, Personal mastery for managerial excellence, Role of self in creating inclusive organization.

Unit III: Spirituality and innovation, mind sciences for creativity, role of intentions in decision making; systemic organizational approaches to creating enlightened organizations.

Unit IV: UN Agenda 21, Spiritual dimension of sustainable development, Spirituality for creating inclusive societies, Green consciousness, Sustainable living.

Unit V: Value based social engagement: Role of business, NGOs and Government; Socially Responsible Investment, Role of Civil Societies for creating socially responsible and morally sensitive business social partnership for economic and social development;

**AREA 2: ECONOMICS AND PUBLIC POLICY**

(MBAFT-7201 TO MBAFT-7202)
MBAFT-7201: ECONOMIC GROWTH AND DEVELOPMENT

Course Objectives:
This course introduces students to the main issues concerning economic growth and development. There are two distinct but interconnected broad themes here. The first half of the course focuses on economic growth, where macro theories of growth and the associated data are discussed. In the second half, the most prominent issues related to economic development are introduced. The emphasis is on understanding the data and how to draw conclusions. Although the bulk of the course is based on “macro-perspective”, the newer “micro-perspective” based research developments and results are discussed too.

Course Learning Outcomes:
1. Understanding the state of nations in terms of economic growth: history and trends
2. Understanding the growth model and test their validities
3. Analyzing the role of technology in economic growth
4. Analyzing development in terms of commonly measured macro-variables
5. Understanding and analyzing the recent developments in research methodology

Contents:

Unit III: Technology. Intellectual Property. Economics of Ideas,

Suggested Readings:
This course requires the students to read a number of academic articles, both old and recent. A list of articles corresponding to each topic will be given by the instructor during the course.

**MBAFT-7202: ECONOMICS OF INNOVATION**

**Course Objectives:**

This course has two broad themes: understanding economic determinants of innovation and technological change, and management of innovation. For the first part, the focus will be on understanding technological changes and its impact, from the economics perspective. The history of innovation and technological change will also be covered to give the background for modern systems of innovation, as well as to understand the evolution of industries and
intellectual property right systems. In the second part, the management of innovation and innovative activities inside businesses will be discussed. The focus of this part is to understand how firms formulate technological innovation strategy and how they appropriate the gains. The course will also address the topic of technological leap-frogging and issues related to developing countries.

Course Learning Outcomes:

1. Knowing the history of innovation and its connection to the present
2. Understanding the models of innovation
3. Analyzing the role of Intellectual Property Rights and the role of Institutions
4. Understanding the theories and practices of management of innovation
5. Analyzing innovation in the context of developing countries

Contents:

Unit I: Economics of Innovation. History. Industrial Revolutions.

Unit II: Types of Innovation. Sources of Innovation. Path Dependency, Theories of Innovation, Firm Characteristics and Innovation. Industry Characteristics and Innovation,

Unit III: IPRs. Theories of IPR. Spillover and Appropriability

Unit V: Innovation in Developing Countries: China, India. Role of the Government.

Suggested Readings:

This course requires the students to read a number of academic articles as well as technology and company reports. The list of articles and reports corresponding to each topic will be given by the instructor during the course.

**AREA- 3: ENTREPRENEURSHIP**

(MBAFT-7301 to MBAFT-7302)

**MBAFT-7301: MANAGING HUMAN RESOURCES IN SMEs/START-UPS**

**Course Objectives:**

The legitimization of Human Resource (HR) is generally undermined among Small & Medium Enterprises (SMEs)/ start-ups. The objective of this course is to help the students appreciate
the significance of formalizing HRM in SMEs/start-ups. The course is designed to promote an understanding of the key issues that apply to the sector. The syllabus is intended for both, HR specialists as well as entrepreneurs.

**Course Learning Outcomes:**

1. Understanding the significance of HRM among SMEs/ start-ups
2. Learning to design and apply HRM practices in SMEs
3. Developing an understanding of the role of CEOs/Leadership and culture in implementing HR practices
4. Learning to measure HR practices in SMEs/Start-ups

**Contents:**

**Unit I:** Business Environment and SMEs/Start-ups: Growth and current status; Difference between HRM for SMEs/ Start-ups and large corporations; Stages of growth in SMEs and HR implications; HR models in SMEs.

**Unit II:** HRM practices in SMEs/Start-ups: recruitment, retention, training, rewarding, and performance management.

**Unit III:** Determinants of best HR practices in SMEs: role of CEO/leadership; SME culture.

**Unit IV:** Problems with implementing HR practices in SMEs: balancing formal practices with flexibility

**Unit V:** Measuring HR practices in SMEs/ Start-ups

**Suggested Readings:**

MBAFT-7302: ENTREPRENEURSHIP, CREATIVITY AND INNOVATION

Course Objectives:
The objective of this course is to help the students to develop an entrepreneurial mind set and gain an understanding of the entire entrepreneurial process through analysis of various situations.
Additionally, the purpose of the course is also to gain insights about the critical role of creativity and innovation to the development of new products and services in entrepreneurial start-ups.

**Course Learning Outcomes:**

1. Explain the meaning and significance of entrepreneurship and understand the process of entrepreneurial action.
2. Understand the entrepreneurial mindset and personality.
3. Understand the importance of idea generation, identifying opportunities and the value of a business plan.
4. Understand the role of creativity and innovation in entrepreneurship.
5. Examine strategies for growth and identify the human resource challenges for managing growth.
6. Understand the concept of social entrepreneurship and appreciate how social entrepreneurs mobilize scarce resources to affect social change.
7. Understand how established firms can develop an entrepreneurial culture and the challenges of doing so.

**Contents:**

**Unit I:** Entrepreneurship and the Entrepreneurial process

**Unit II:** The Entrepreneurial mindset and personality.

**Unit III:** Idea generation, identifying opportunities and evaluation.

**Unit IV:** Creativity and Innovation.

**Unit V:** Managing Growth

**Unit VI:** Social entrepreneurship and Innovation

**Unit VII:** Corporate Entrepreneurship

**Suggested Readings**

The list of cases and other specific references including recent articles will be announced by the instructor at the time of launching the course

**AREA- 4: FINANCE (MBAFT-7401 to MBAFT-7414)**

**MBAFT-7401: QUANTITATIVE ANALYSIS OF FINANCIAL DECISIONS**

**Course Objectives:**

This course develops concepts and techniques that are applied to financial modeling and financial decisions such as: working capital management, capital budgeting, capital structure, dividend policy, cost of capital and mergers and acquisitions. It stresses the application of theory and techniques and extensive use of case studies.
Learning Outcome:

It is expected that after this course the Students should build spreadsheet financial models for complex Financial Decisions in the area of Investment Banking, Equity Research, Business valuation, Project Finance, Portfolio Construction, Investment Banking, Market and Credit Risk Analysis and make sound Financial Decisions. On the basis of their Financial models, they will submit a report on the overview of different sectors such as IT, Oil & Gas, Telecom, Retail etc.

Contents:

Unit I: Techniques of Financial Data Analysis and Forecasting, Multiple Regression models for financial data, Exponential Smoothing and ARIMA models for analysis and forecasting of financial data, ARCH, GARCH and EGARH models for estimating asset price volatility and volatility forecasting. (Using MS-Excel, @Risk and Eviews).

Unit II: Risk analysis in Capital Budgeting, Advanced Financial Functions, Simulation Functions, sensitivity and scenario analysis tools available in MS-Excel, @Risk and Eviews. Simulating and Forecasting cash flows, WACC, growth rate, Finding probability P(NPV <0). NPV for dependent cash flows, Decision tree.

Unit III: Equity Research and Portfolio, Measuring the systematic and non-systematic risk of assets using regression and Simulation, spreadsheet models for construction of portfolio of equity, options and futures. Portfolio performance, Equity and Bond Valuation

Unit V: Capital Structure Decisions, Theories of capital structure – Relevance of Debt capital in the capital structure, EBIT-EPS analysis, Corporate Debt Capacity Management Decisions, Cost-volume-profit analysis under conditions of uncertainty.

Unit VI: Working Capital Decision, Estimation and Projection of working capital Decisions, Estimation of Working capital requirements, Valuation of in Inventories Inventory Strategies techniques of Inventory Management, Variables of credit policy credit granting decisions

Unit VII: Valuation Decisions, Valuation models using valuation toolset-Comparable Companies Analysis, discounted cash flow analysis, precedent transaction analysis, Valuation using Black-Sholes- Merton option pricing model. leasing vs borrowing Decisions

Unit VIII: Business Failure and Reorganization, Application of Multiple Discriminant Analysis; Decision Tree Analysis,

MBAFT-7402: SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT

Course Objectives:
The basic purpose of this course is to develop a strategic and policy perspective by developing a robust understanding of the principles of Financial Investment decisions of an investor with respect to the various avenues of investment and their management strategies.

Course Learning Outcomes:
After successfully completing this course, the participants will be able to –

1. Evaluate the investment environment for Indian investor for various avenues of investment
2. Formulate strategies for investment in equities, bonds and other instruments
3. Construct, revise and evaluate portfolios of different securities

Course Contents:

**Unit I: Introduction to Financial Investments**

**Unit II: Equity Investment**

**Unit III: Fixed Income and Other Investment Alternatives**

**Unit IV: Modern Portfolio Theories**

**Unit V: Asset Pricing**

**Unit VI: Evaluation of Investment Performances**

**Suggested Readings:**

**Teaching Plan:**

Keeping in view of the number of weeks available in a particular semester, detailed course instructions will be shared by the faculty at the time of launching the course.

**MBAFT-7403: FINANCIAL ANALYTICS**

**Course Objectives:**

Many problems in quantitative finance involve the study of financial data. Such data most often comes in the form of ‘time series’, which is a sequence of random variables that are ordered...
through time. The objective of this course is to provide knowledge of advanced quantitative and simulation tools to analyse financial data available on the performance of company, industry and economy, for forecasting future financial performance and to present suitable valuations. It is expected that after this course the students should be able to build spreadsheet financial models using software packages such as Microsoft Excel, EViews and @Risk for the analysis of business management problems in the area of Equity Research, Portfolio Construction, Investment Banking, Business Valuation, Project Finance, Market and Credit Risk Analysis and make sound Financial Decisions

**Learning Outcome:**

This course introduces a set of modern analytical tools to solve practical problems in finance and bridge the gap between finance theories and practice by building operational models. Students should build spreadsheet financial models for complex Financial Decisions in the area of Investment Banking, Equity Research, Business valuation, Project Finance and Financial Risk Management. On the basis of their Financial models, they will submit a report on the overview of different sectors such as IT, Oil & Gas, Telecom, Retail etc.

**Contents:**

**Unit I:** Introduction of Software @ Risk and EViews, Introduction to financial data Analysis Using EViews and @Risk, Simulation, Decision making, Uncertainty

**Unit II:** Techniques of Financial Data Analysis and Forecasting-I, Types of Data, Cross-section Data, Panel Data, Time series analysis, Exponential Smoothing, Classical Linear Regression Model

**Unit III:** Techniques of Financial Data Analysis and Forecasting-II, ACF, PACF, correlogram, Stationary and Nonstationary Timeseries, Test of Stationarity, Auto Regressive, Moving Average, ARMA models of Stationary Time Series

**Unit IV:** Techniques of Financial Data Analysis and Forecasting-III, ARIMA (p, d, q) models for analysis and forecasting of financial data

**Unit V:** Techniques of Financial Data Analysis and Forecasting-IV, Diagnostic checking, Q and LB Statistic, Box Jenkins Methodology for ARIMA models. Practical Applications using financial data, Evaluation of Forecasts, Root Mean Square Error, Thiel Statistics

**Unit VI:** Multiple Regression models for financial data, Multiple Regression models for financial data, Cointegration, Vector Auto regression, Vector Error Correction Model, Logit and Probit models

**Unit VII:** Modelling asset return volatility, ARCH, GARCH and EGARCH models for estimating asset price volatility and volatility forecasting. (Using MS-Excel, @Risk and EViews).
Unit VIII: Equity Research and Portfolio Models-I, Measuring systematic and non-systematic risk of assets using regression and Simulation, spread sheet models for the construction of a portfolio of equity, Portfolio performance

Unit IX: Equity Research and Portfolio Models-II, Equity and Bond Valuation. Valuation using Black-Sholes-Merton option pricing model

Unit X: Financial Risk Models-I, Spread sheets for Measuring Market risk, Value at Risk (VaR)

Unit XI: Financial Risk Models-II, Calculation of Market risk using Historical and Monte-Carlo simulation

Unit XII: Financial Risk Models-III, Stress-testing, Back-testing. Altman Z score model, calculation of the probability of default using equity prices, Discriminant Analysis

Suggested Readings:

**MBAFT-7404: INTERNATIONAL FINANCIAL MANAGEMENT**

**Course Objectives:**

The course has been designed to acquaint the students with the conceptual framework of the key decision areas in multinational business finance. The objective of the course is to provide an overview of the financial environment in which multinational firms operate.

**Course Learning Outcomes:**

2. Functions and how Foreign Exchange Markets work, Theories of Foreign Exchange Rate Movements and International Parity Conditions.
3. Understanding the Foreign Exchange Risks faced by MNCs.
4. Determine the Cost of Capital and Capital Structure for a Multinational Firm, Problems and Issues in Foreign Investment Analysis, Calculating NPV, IRR and APV for Foreign Investment Decisions

MBAFT-7405: MERCHANT BANKING AND FINANCIAL SERVICES

Course Objectives:

The objective of the course is to understand role of Financial Services in business organizations and to give an insight into the strategic, regulatory, operating and managerial issues concerning select financial services. In addition, the course will examine the present status and developments that are taking place in the financial services sector and developing an integrated knowledge of the functional areas of financial services industry in the real-world situation.

Course Learning Outcomes:

1. Understanding the financial system, markets and the risk management systems. A global perspective of financial services.
2. Role of merchant bankers in corporate advisory services, Understanding different kinds of issues, functions and management of depository in India, stock exchange and stock trading in India.
3. Role and importance of domestic and international credit rating agencies, types of credit cards and debit cards, concept of term sheet.
4. Understanding bank ratios across time, Techniques used by banks for ALM analysis, risk management and Basel rules.
5. Mutual fund valuation, Development of insurance in India, review and challenges in private equity and hedge funds, Securitization process, structuring a securitization deal.
6. Financial evaluation of lease financing, Mechanism of factoring and forfaiting, Creating synergy, Determine the swap ratio.

Contents:

Unit II: Merchant Banking and Issue Management: Meaning, Different Kinds of Issues, Book Building, Green Shoe Option, Depository System, Stock Exchange.

Unit V: Mutual Funds and Insurance Services: Banc Assurance, Reinsurance. Private Equity and Hedge Funds, Securitization: Structuring a Securitization Deal, Securitization Process, Risks and Limitations of Securitization.

Unit VI: Leasing and Hire purchase, Factoring and Forfaiting, Mergers and Acquisitions.

MBAFT-7406: MANAGEMENT CONTROL SYSTEM

Course Objectives:
The course is designed to allow the student to gain knowledge, insights and analytical skills related to how the finance managers go about designing, implementing and using planning and control systems to implement corporate strategies.

Course Learning Outcomes:
1. Strengthening the foundations of the analytical approach to Management Control System
2. Understanding the conceptual framework of management control
3. Understanding the techniques of management control process and Variation in managerial control system
4. Understanding Strategic Cost Control.
5. Understanding the inter-firm strategies and behaviour

Contents:

Unit I: Conceptual framework of management control: Nature of Management Control Systems, Understanding Strategies, Behaviour in Organizations, Responsibility Centers, Revenue and Expense Centers, Profit Centers, Responsibility Accounting, Inter-divisional Transfer Pricing, Measurement of Divisional Performance including Performance Evaluation - Qualitative and Quantitative, Investment Centre and Measuring and Controlling Assets Employed

Unit II: Techniques of management control process: Strategic Planning, Steps in management control process Budget Preparation, Planning and Procedures, Budgetary Control, Analysis of Variance, Performance Budgeting, Accounting Aspects of Control including Internal Audit and Control and Value for Money, Analysis and Reporting, Variance Reporting, Analyzing Financial Performance Reports, Performance Measurement, Management Compensation, Behavioural aspects of management control such as motivation and morale, Goal Congruency, Participative and Responsive Management.

Unit III: Variation in managerial control system: Controls for Differentiated Strategies, Service Organizations, Multinational Organizations and Management Control of Projects

Unit V: Marking, Theory of Constraint, Uniform Costing and Inter-firm comparison, Profitability analysis - Product wise / segment-wise / customer wise.
Suggested Readings:

The list of cases and specific references including recent articles will be announced in the class at the time of launching of the course.

**MBAFT-7409: PROJECT PLANNING, ANALYSIS AND MANAGEMENT**

**Course Objectives:**

The aim is to provide a suitable framework for gaining insight into the process of preparation, appraisal, monitoring and control of a project. The role project management techniques and how to mobilize finance for domestic and international projects shall be highlighted.

**Course Learning Outcomes:**

1. Strengthening the foundations of the analytical approach to Project Planning & Management
2. Understanding project preparation
3. Understanding the history, approaches, framework and processes of projects
4. Understanding the project appraisal techniques
5. Understanding the project financing and implementation

Contents:

**Unit I:** Project Preparation: Meaning and importance of Project; Types of project; Project life cycle; Project planning & implementation; Management action; Investment returns; Corporate strategy; Objectives of Project Planning, monitoring and control of investment projects. identification of investment opportunities; Pre-feasibility Studies; Project Preparation: Technical feasibility, estimation of costs, demand analysis and commercial viability, risk analysis, collaboration arrangements; Planning Overview Strategy and Resource Allocation Generation and Screening of Project Ideas; financial planning; Estimation of fund requirements, sources of funds; Loan syndication for the projects. Tax considerations in project preparation and the legal aspects. Project management tools, process, plans and project planning tips; Balanced scorecard, design project management; Project Management Templates

**Unit II:** History of project management; Project management approaches: Traditional Approach, Critical Chain Project Management, Extreme Project Management, Event Chain Methodology; Process-based management; Project development stages; Project control systems; Project Management Framework; International Project Management Standards; Project Planning Strategies and Tools; Project Management Frameworks; Project Phases and Milestones; Project Goals; Project Processes.

**Unit III:** Project Appraisal: Business criterion of growth, liquidity and profitability, social cost benefit analysis in public and private sectors, investment criterion and choice of techniques: Estimation of shadow prices and social discount rate. Financial evaluation: Project rating index; Time Value of Money; Investment Criteria; Project Cash Flows; Cost of Capital; Project Risk Analysis; Project Rate of Return; Special Decisions Situations. Mathematically modeling for multiple projects: Mathematical techniques for project evaluation; Network technique for project management; Multiple projects and constraints
Project Appraisal for financial institution; Preparation of project report.

**Unit IV:** Project Financing and Implementation: Judgmental, Behavioural, Strategic and organisational Considerations; Financing of Project: Raising finance in domestic market and international market; Infrastructure financing; Tax planning while financing for projects; Implementation. Project Management: NetworkTechniques for Project Management; Project Review and Administrative aspects. Contemporary issues in project appraisal: Project evaluation in non-profit sector; mergers and acquisitions; Project management principles by project management institute USA; Project management software.

1. Understanding the structure of marketing channels and flows associated
2. Demonstration procedure for designing distribution channels
3. Understanding of behavioral issues in marketing channels
4. Understanding of other marketing mix elements on channels and evaluation of the performance of channel members
5. Demonstration of international channel perspective

Contents:
Unit 1: Marketing Channel: Structure and Function, Need for intermediaries, Types of intermediaries, flows associated in marketing channels, Distribution strategies

Unit II: Design of marketing channel. Selecting the marketing channel. Issues in designing distribution channels

Unit III: Behavioral process in marketing channel. Power and Conflict management, motivating the channel members.

Unit V: Marketing Channel for service. International Channel perspective. Strategic Alliances in marketing channel. Legal constraints on marketing channel policies

**MBAFT-7612: MARKETING ANALYTICS**

**Course Objectives:**

The course will introduce marketing analytics and its commonly used tools. It would focus on developing an understanding of the data available to marketing managers and the tools for generating insights from data and how such insights are used in marketing decision making. Students would get hands-on opportunity for learning these skills.

**Course Learning Outcomes:**

1. Understand the importance of data and analytics in marketing decisions
2. Ability to apply key marketing analytics tools and techniques
3. Understand the marketing decision-making process and the role of marketing analytics in better decisions.
4. Ability to apply marketing analytics procedures to business problem solving
5. Ability to analyze complex issues, think critically and communicate effectively
6. Awareness of ethical issues related to marketing data collection and use of analytics

Contents:

**Unit I**: Introduction to Marketing Analytics: Meaning and scope of marketing analytics, Sources of marketing data, Marketing metrics and measurements, Offline and digital marketing measures, Marketing analytics in the age of big data.

**Unit II**: Product analytics: Pricing and revenue management; Segmentation, targeting and positioning; Marketing mix analytics; Assortment optimization; New product and service design.

**Unit III**: Customer Analytics: Customer lifetime value, Customer choice, Market basket analysis, Cross-selling and optimization.

**Unit IV**: Emerging issues in marketing Analytics: Data collection and Protection laws; Ethical use of data and analytics; Future of marketing analytics.

**Suggested Readings:**

**Facilitating the achievement of Course Learning Outcomes**

### MBAFT-7613: ADVANCED MARKETING RESEARCH

#### Course Objectives:

The objective of this course is to familiarize the students with higher order research tools and techniques. The key to achieving marketing effectiveness lies in the ability to make decisions based on insights. In this regard, knowledge and skills are essential to be able to conduct research in marketing areas like advertising, pricing and consumer behavior and take decisions based on evidence.

#### Course Learning Outcomes:

1. Understanding the essence of decision making in the context of marketing
2. Strengthening and extension of the foundation laid in marketing research
3. Understanding multivariate techniques that can be used in practising marketing
4. Learning to apply tools like discriminant analysis, conjoint analysis and cluster analysis
5. Learning to use statistical software in conduct of data analysis

#### Contents:
Unit I: Introduction to an interface between marketing and research: marketing problems and need for investigation; Research process: defining problems, determining objectives and development of research design; Types of research; Online and off-line data sources

Unit II: Qualitative research and quantitative research; Causal research and challenges; Survey instrument design: process and psychometric properties; Scaling and statistical properties; Multidimensional scaling.

Unit III: Multivariate analysis: decision involving more than a single variable; Multivariate analysis in consumer and market research; Factor analysis: finding dominant patterns and latent structures; Relationships between columns in data tables; multiple regression analysis

Unit IV: Consumer value, product design and conjoint measurement; Extracting consumer preferences during the purchasing process into a quantitative measurement; Data requirement for conjoint analysis; two-factor trade off analysis, full profile analysis; Choice based and adaptive conjoint analysis

Unit V: Cluster analysis: organization of observed date into meaningful categories; Cluster analysis method: tree clustering, block clustering and k-means clustering; Structural equation models

MBAFT-7614: GLOBAL MARKETING

Course Objectives:
The scale and scope of marketing have become global. Firms directly or indirectly participate in markets. This course is designed to make the participants learn about the challenges involved in marketing across borders. The environmental differences cause firms to adapt their marketing strategy and mix which requires a nuanced approach to dealing with changes.

Course Learning Outcomes:
1. Developing basic vocabulary and understanding of marketing in global environment
2. Understanding of different markets and cultures as marketing opportunity
3. Evaluate different options of operations in international markets
4. Apply theoretical frameworks to guide decision making for marketing in global context
5. Understand and appreciate the role of socio-legal-cultural factors on marketing mix variables

Contents:
Unit I: Introduction to globalization and marketing across borders; global trade and marketing; Drivers of globalization; Multinational corporations; Dynamic environment of
international trade; Trade theories

**Unit II:** Global market environment; political environment, political systems, dumping; legal environment; tariff barriers, multiplicity of legal environments; political risk; culture dynamics and influence on marketing mix; and consumer behavior and social dimensions

**Unit III:** Assessing global market opportunities; global marketing research; Quantitative and qualitative research; Problems in gathering data; Data reliability; Marketing information system; Foreign market entry strategies; Market regions

**Unit IV:** Product strategy: levels, lifecycle management, brand strategy, international branding strategy, brand levels and alternatives, new product development for global markets; Product and culture; International pricing: pricing strategies, psychological pricing, pricing models, non-price factors, strategy for price leadership

**Unit V:** Distribution in global marketing: distribution pattern, alternative middlemen choices, factors affecting choice of channels; Export logistics; Global promotion: designing and selecting sales force, global advertising, creative challenges, advertising appeals, message strategy and advertising effectiveness

**Suggested Readings:**

MBAFT-7615: RURAL MARKETING

Course Objectives:
To provide students with an understanding of the Indian rural marketing environment and enable students to plan products and strategies that would help in overcoming the challenges of rural markets.

Course Learning Outcomes:
1. Understanding the nature and importance of rural markets
2. Sensitizing students to the needs and behavior of rural consumers
3. Understanding the peculiarities of rural markets and competition in marketing decision making
4. Understanding rural marketing mix and the changes required in product and pricing
5. Understanding distribution channels and communication mix for rural consumers
6. Learning about issues and challenges of rural marketing

Contents:

Unit I: Introduction- Definition, Scope of Rural Marketing, Concepts, Components of Rural Markets, Rural versus Urban Markets, Rural Market in India – size and scope, Factors contributing to Growth of Rural Markets

Unit II: Rural Consumer behavior- Characteristics of rural consumers, Occupation and Income, Economic circumstances, Lifestyle, Consumer buying behaviour models, Factors affecting Rural Consumer Behaviour, Consumer Buying Process

Unit III: Rural Marketing Environment- Rural Environment, Occupation Pattern, Expenditure Pattern, Rural Demand and Consumption Pattern, Rural Markets-Segmentation, Targeting and Positioning strategies, Four A’s of Rural Marketing Mix

Unit IV: Product and Pricing - Classification of products and services in Rural marketing,

**Unit V**: Distribution and Communication - Accessing Rural Markets, Channels of Distribution, Prevalent Rural Distribution Models, Emerging Distribution Models, Rural Retail System, Rural Communication strategy, Rural Media, Advertising and promotion strategies for rural markets, Challenges in Rural Communication

**Unit VI**: Shaping the Future of Rural Marketing- Identifying and Handling Constraints in Rural Marketing, Corporate Social Responsibility in Rural Markets, Future of Rural Marketing in India- Role of Government, Rural Micro Finance, Digitalizing the Indian rural markets.

**Suggested Readings:**

**Facilitating the achievement of Course Learning Outcomes**

<table>

### III. Rural Marketing Environment

**Behaviour**
- Using case studies to understand the Indian Rural Environment, Demand and Consumption Pattern, STP strategies, Consumer Buying Process, Rural Marketing Mix
- Mini case studies and group exercises

### IV. Product and Pricing

**Behaviour**
- Discussion on classification of products and services in rural markets, Importance of Branding, Packaging and Labelling, New Product launch techniques for rural markets, Nature of Competition in Rural Markets, Pricing Strategies in Rural Markets with the help of case studies
- Approaching the FMCG companies which have already catered in Rural markets to understand their strategy,
- Exercise on designing new product strategy in accordance with the rural marketing mix

### V. Distribution and Communication

**Behaviour**
- Presentation and discussion on Accessing Rural Markets, Channels of Distribution, Prevalent Rural Distribution Models, Emerging Distribution Models, Rural Retail System, Rural Communication strategy, Rural Media, Advertising and promotion strategies for rural markets, Challenges in Rural Communication with the help of case studies and exercises
- Case Studies of Successful companies in Rural Markets like HUL, ITC, Godrej etc., quiz

### VI. Shaping the Future of Rural Marketing

**Behaviour**
- Discussion on Issues and Constraints in Rural Marketing, Future of Rural Marketing in India
- Exercise, MCQ’s

The list of cases and other specific references including recent articles will be announced by the instructor at the time of launching the course.

---

**AREA-7: OPERATIONS MANAGEMENT & DECISION SCIENCES**

(MBAFT-7701 to MBAFT-7712)

**MBAFT-7701: OPERATIONS STRATEGY**
Course Objectives:

The key objective of this course is to appreciate the need and role of operations as a strategy particularly in view of cost, quality, flexibility and time competitiveness. Various strategic choices are analyzed in different sub-functions of operations. The operations strategies especially in the light of globalization, environmental, ethical and social concerns as also the work force diversity issues are to be discussed.

Course Learning Outcomes:

1. Appreciate the nature, need and scope of operations strategy.
2. Appreciate the strategic role of transformation processes, flows and their layout and capacity.
3. Develop and analyse innovation, new product and process development strategies.
4. Develop analytical skills to develop operations improvement strategies.
5. Build knowledge and skills about strategic purchasing and outsourcing of materials.
6. Analyse process of operations strategy in terms of sustainable alignment.
7. Appreciate the new approaches to operations and develop substitute strategies.
8. Analyse process of strategy formulation.

Contents:

Unit 2: Process of designing, analysing and implementing operations’ strategies, Strategic management of transformation processes and flow strategies, Strategic choices in layout and capacity planning.

Unit 3: Managing innovations and new product and process development strategies

Unit 4: Strategic purchasing and supply management, Outsourcing decisions, Strategic Purchasing Portfolio analysis,

Unit 5: Operations Improvement Strategies, Breakthrough vs continuous, The Direct, Develop and Deploy strategies and the market strategy, Bohn’s stages of process matrix, Measures of performance.

Unit 6: Process of Operations strategy, sustainable alignment, Methodology of operations strategy formulation.

Unit 7: The ‘new’ approaches to operations; different substitutes for operations strategy,

Suggested Readings:

**Teaching plan:** A detailed teaching plan would be shared before the start of the semester.

**Facilitating the achievement of Course Learning Outcomes**

MBAFT- 7702: TOTAL QUALITY MANAGEMENT FOR BUSINESS EXCELLENCE

Course Objectives:
The key objective of this course is to acquaint the students with the conceptualization of Total Quality (TQ) from design assurance to processes’ assurance to service assurance. TQM is to be linked with business excellence through management frameworks and award criteria. An additional objective is to give focus on Quality Management Systems (QMS) like ISO-9001. The course would also aim to closely link management of quality with that of reliability and maintainability for total product assurance. Integration of operations systems like ISO 14001 (EMS) and occupational safety and health (OSH) and total productive maintenance (TPM) is also to be analysed. The dimensions of quality in services in the contemporary environment are also to be focused.

Course Learning Outcomes:
1. Appreciate the nature, need and scope of total quality management and its relationship with operational and then business excellence.
2. Appreciate the quality of design, off-line control, losses and costs of quality.
3. Develop and analyse tools for hazard analysis.
4. Understand conceptual framework of TPM and study concept of OEE.
5. Build knowledge about statistical process control through process capability studies.
6. Deploy total quality principles in supply and vendor management
7. Develop knowledge and skills about quality improvement tools.
8. Develop total quality relationship with environment and safety systems.

Contents:
Unit 1: Concept of Total Quality and its evolution, Components of a Total Quality Loop. TQM and business excellence frameworks e.g. MBNQA, EFQM, Deming, TBEM etc.

Unit 2: Quality of Design; Taguchi’s Loss Function, Costs of quality.

Unit 3: FMEA/FTA, HAZOP and HACCP; concepts and application

Unit 4: TPM; model, organization and implementation, losses and concept of OEE.

Unit 6: Quality of Purchasing; Supplier qualification systems. TQM and JIT.

Unit 7: Quality improvement tools; basic and advanced, Quality Function Deployment (QFD)

Unit 8: Total Quality, Environment and Occupational Health and Safety: Introduction to relevant standards; their integration in implementation.

Suggested Readings:

**Teaching plan:** A detailed teaching plan would be shared before the start of the semester.

**Facilitating the achievement of Course Learning Outcomes**

MBAFT- 7703: INTEGRATED MANAGEMENT SYSTEMS

Course Objectives:

The objective of this course is to enable the participants to appreciate the role of Integrated management systems like total quality, total productive maintenance (TPM), occupational safety and health (OSH) and environment management together with sustainability and social accountability at the corporate level and at work place. The course particularly focuses on importance of human factors of engineering, TPM, environment management system (EMS) and its standards. It also focuses on OSH policy and environmental policy setting and auditing and use of green technologies for global competitiveness.

Course Learning Outcomes:

1. Appreciate the role of ergonomics, safety and human factors of engineering in a worksetting.
2. Compare global safety frameworks and statues with those of India.
3. Study frameworks of various failure and hazard analysis techniques.
4. Conceptually analyse a total productive maintenance strategy and its implementation.
5. Analyse various elements of Environment Management System (EMS)
6. Configure various elements of a Total Safety System and Occupational health and safety system.
7. Concurrent implementation of total quality, environment and occupational safety and health initiatives.

Contents:

Unit 1: Introduction of Ergonomics and Human Factors of Engineering in Industries;

Unit 2: Review and comparison of global and Indian legal provisions related to Occupational Safety and Health including OSHA and Factories Act;

Unit 3: Introduction to FMEA, FTA, HAZOP and HACCP Studies;

Unit 4: Introduction to Total Productive Maintenance (TPM); Pillars of TPM, TPM Master Plan

Unit 5: Framework for Total Quality Environment Management; Environmental Management System Standards: ISO 14000; Environmental Auditing; Environmental Performance Metrics; Environment Impact Assessment (EIA)

Unit 7: Concurrent implementation of TQM, TPM, OSH and EMS initiatives. Social accountabilitySafety related statutory bodies in India.

Suggested Readings:

**Teaching plan:** A detailed teaching plan would be shared before the start of the semester.

### MBAFT-7704: WORLD CLASS MANUFACTURING

#### Course Objectives:

The course is designed to help students develop an insight into the advanced operations and manufacturing practices prevalent across the globe. The students will also develop an understanding about the applicability of the world class manufacturing (WCM) concepts and practices across both manufacturing and service organizations. The course would equip them with the concepts, tools, techniques and benchmarks of WCM practices which would enable them to apply the same in their organisations in order to excel in overall operational performance. The pedagogy of the course would involve lectures, case discussions, exercises and mini-projects to be carried out in groups.

#### Course Learning Outcomes:

1. Appreciate the concept and need of world class manufacturing.
2. Recognise the need to implement agility and flexibility in manufacturing system in current context.
3. Lay down frameworks of various product and process design structures and systems in modern manufacturing.
4. Conceptually analyse the implementation of TQM, JIT and Theory of Constraints.
5. Grasp the philosophy and principles of Japanese manufacturing especially Toyota Production System (TPS).

7. Appreciate the framework of a computer integrated manufacturing system and deploying ERP in manufacturing.

8. Develop benchmarks for operational excellence through world class manufacturing practices.

Course Contents:

Unit 1: World Class Manufacturing (WCM): Concepts and Evolution, Understanding the linkage between Operations Strategy and WCM;

Unit 2: Agile Manufacturing: Distinction between flexibility and agility, Model for implementing flexible and agile manufacturing; Flexible Manufacturing System (FMS); Concepts and components.

Unit 3: Modern product and process design concepts and considerations, Assembly lines and batch manufacturing; group technology (GT).

Unit 4: Total Quality Management (TQM): Roadmap to Implementation of TQM in manufacturing; Six Sigma approach, Just-in-Time (JIT) and Lean Operations, Theory of constraints (ToC),

Unit 5: Japanese manufacturing techniques particularly Toyota Production System, Japanese vs American manufacturing focus, Critical elements of JIT, Operational Framework for concurrent implementation of TQM and JIT:

Unit 6: Total Productive Maintenance (TPM): Concepts and Evolution, Metrics of TPM; Overall Equipment Effectiveness (OEE), Roadmap to TPM implementation in modern manufacturing;

Unit 8: Benchmarks for excellence in operational performance with global examples; Significance of implementation of concurrent operations management initiatives, Metrics of operational excellence in global context.

Suggested Readings:

**Teaching plan**: A detailed teaching plan would be shared before the start of the semester.

**MBAFT-7705: TECHNOLOGY, INNOVATION AND NEW PRODUCT MANAGEMENT**

**Course Objectives:**

This course aims to enable students to appreciate the role of technology, innovation and new product management in both corporate and public sector. It also aims to equip students with an understanding of the concerns in the management of technological innovation and new product development. The course would emphasize on strategic aspects of decision making involved in technology choices, investment options, level of technology absorption and the derived competitive advantages, particularly in the Indian context. It shall focus on developing innovative organization culture and suitable incubation climate. It aims to analyse the marketing and production aspects of new products and services and appreciate the role of the State in policy making in managing new technologies.
Course Learning Outcomes:

1. Understanding the diversity of types of innovation, innovators and innovation environment.
2. Understanding a strategic perspective of the role of innovation and the major tools that are used increasingly to assist innovation management.
3. Understand the nature and extent of technological change and potential roles of incremental and disruptive innovation in creating and sustaining firm competitiveness.
5. Analyse feasibility and viability of new product development both from a societal and a micro level perspective.

Contents:

Unit 1: Introduction, Understanding innovation, Levels and types of innovation, Key drivers of innovation, Sources of innovation, and the relationship between innovation and research and technology development. Understanding creativity as a building block to innovation

Unit 2: Innovation Management, Framework for the management of innovation, Public sector services innovation, Diffusion of Innovation Creating Organizational innovative effectiveness

Unit 3: Strategic aspects of technology, Critical factors in managing technology innovations, Critical issues/factors in choice of technology and Processes; Indian context, Technology Portfolio

Unit 4: Open Innovation, New technology transfer- Channels, Modes, levels and various concerns involved,

Unit 5: Absorption, Adaption and adoption of Technology, Technology considerations in Lean environment

Unit 6: Strategic Role of R&D, New R&D approaches, Strategic evaluation of technology investments

Unit 7: New product development and life cycle management, Understanding Product platform strategy, Commercialization of core competencies, Marketing new products and technologies

Unit 8: Public policy issues; role, rationale and requisites of a National Technology Policy, IPR and licensing issues; Role of WTO in new age technology.

Suggested Readings

MBAFT-7706: SERVICE OPERATIONS MANAGEMENT

Course Objectives:
The objective of this course is to acquaint the participants with decision making in planning, design, delivery, quality, maintenance and scheduling of service operations on a global basis. The participants are also expected to appreciate the role of service quality and supply chain in emerging service economy of India in relation to international business environment and global benchmarks.

Course Learning Outcomes:
1. Appreciate complex nature of services and their classification
2. Appraise the factors related to location and capacity planning for services
3. Analyze various service design and delivery systems
4. Study job and work design in services and develop standards.
5. Develop skills to measure, control and improve quality of services.
6. Develop skill to schedule services and resources.
7. Grasp knowledge about supply chain and distribution of services.
8. Analyze requirements to ensure maintainability and reliability in services.

Contents:

Unit 1: Matrix of Service Characteristics; Taxonomy of services, Challenges in Operations Management of Services.

Unit 2: Aggregate Capacity Planning for Services; Facility Location; subjective and objective factors.

Unit 3: Service design and delivery systems; layouts in services.

Unit 4: Job and Work Design in Services- Safety and Physical Environment; Effect of Managing queues, Automation; Operations standards and Work measurement.

Unit 5: Determinants of Quality in Services, Measurement, control and improvement of Quality of Services; Concept of a Total Quality Service, Dynamics of Service Delivery System.
Unit 6: Scheduling for Service operations, personnel and vehicles.

Unit 7: Supply Chain and Distribution of Services.

Unit 8: Maintainability and Reliability in Services; Total Productive Maintenance (TPM) in Services, Case Studies of exemplary professionally managed services.

Suggested Readings:

Teaching plan: A detailed teaching plan would be shared before the start of the semester.

### Course Objectives:

Operations Research / Management Science (OR/MS) uses advanced analytical methods to improve managerial decisions. OR/MS approach consists of scientific research-based principles, strategies, and analytical methods. In this course, some advanced tools and techniques would be discussed. The course would have a balance between mathematical rigor and utility in solving business problem within realistic time limits. Software tools and case studies would be part of teaching pedagogy.

4. Familiarity with software packages used in the industry

Contents:

**Unit I:** Nonlinear programming: Model building, Convex and concave functions, Unconstrained problems and their solution, Kuhn-Tucker conditions, Quadratic programming problems and solution method

**Unit II:** Waiting line models: Finite capacity models, System with blocking, models with any (general) service distribution, priority servicing model

**Unit III:** Multi-criteria decision making: Analytical hierarchy process

**Unit IV:** Stochastic programming: model formulation, models with recourse, business applications

**Unit V:** Dynamic programming: Basic concepts, formulating dynamic programming recursion, business applications.

**Unit VI:** Data envelopment analysis.

**Unit VII:** Modelling competitive decision problems using theory of games. Cooperative and non-cooperative games, games with information asymmetry, stochastic games.

Suggested Readings:

**Facilitating the achievement of Course Learning Outcomes**

MBAFT-7708: PREDICTIVE ANALYTICS AND BIG DATA

Course Objectives:

Data driven decision making and technologies related to data are transforming the way organizations function. Huge amount of data is available today and organizations can get competitive advantage by utilizing this resource efficiently. This course introduces the use of analytics as a strategic resource specifically in the context of big data. Participants should be able to develop skills in integrating the knowledge of analytics tools with organizational strategies and processes.

Course Learning Outcomes:

1. Understand what is big data analytics
2. Develop skills to use predictive analytics tools
3. Ability to think critically and use big data analytics in improving decision making
4. Ability to solve problems using analytics and communicate solutions to different audience
5. Understand opportunities and challenges in investments on analytics in organizations

Contents:

Unit I: Types of data, data warehouse and data-marts, Data quality; Data cleaning, handling missing data and outliers. Overview of big data.

Unit II: Data analytics lifecycle. Data exploration and data visualization. Linear and logistics regression, Decision tree, Model comparison. Clustering, Association rules, Classification, Market basket analysis.

Unit IV: Technology (analytics) solutions and management of their implementation in organizations.

Suggested Readings:

MBAFT-7709: SUPPLY CHAIN ANALYTICS

Course Objectives:
Today’s organizations have to grapple with huge volume of data in its entire supply chain. The sheer volume of data poses unique challenges to the Operations and Supply Chain managers in terms of both variety and velocity. These challenges are discernible across all elements of supply chain functions including demand planning, inventory planning at the level of retailer, distributor and manufacturer, price optimization, logistics planning including both inbound and outbound logistics, production planning and scheduling, procurement planning etc. This course is designed to enable the students appreciate the concepts of Supply Chain Analytics and its significance in the contemporary business environment and equip them with the appropriate tools and techniques to get a feel of real-world supply chain problems.

Course Learning Outcomes:
1. Learn the importance of data-driven supply chains and different analytics techniques relevant to supply chain management (SCM).
2. Develop an understanding of estimating unbiased estimate of forecast demand through various statistical tools and also an understanding of price optimization.
3. Learn the tools for evaluating the sources of supply and establishing supply chain contracts.
4. Learn the tool of determining differentiated service level for different products, determining plant location, product line mix and production schedule.
5. Learn the framework/techniques for distribution of products to distribution centre and retail store.
6. Learn the framework/tools for collecting products from customers and retail store.
7. Learn mathematical tools to capture and analyze data on supply chain carbon footprint.

Contents:

**Unit I:** Problem-driven to Data-driven supply chains. Big data in supply chain. Analytics techniques in SCM: Descriptive, Predictive and Prescriptive.

**Unit II:** (Plan) Analytics in demand planning: Capturing demand data from different sources, Demand prediction models. Price optimization.

**Unit III:** (Source) Analytics in sourcing and procurement: In-house or outsource, Logistics and transportation (Inbound), Supply chain contracts.

**Unit IV:** (Make) Analytics in sales and operations planning: Differentiated service level to different products and customers, Location of plants, Product line mix at plants, Production planning and scheduling.

**Unit V:** (Deliver) Analytics in distribution: Location of distribution centre, Transportation and distribution planning (Outbound), Inventory policies/order fulfilment at locations, Vehicle routing for deliveries.
Unit VI: (Return) Analytics in reverse logistics in traditional and e-commerce firms: Location of return centres, Reverse distribution plan, Vehicle routing for returns collection.

Unit VII: Analytics in supply chain carbon footprint.

Suggested Readings:

10. Relevant research papers.
11. Relevant white papers.

### MBAFT 7710: SUPPY CHAIN MANAGEMENT

#### Course objectives:

This course is designed to help the students understand the role of supply chain (SC) in improving the efficiency of a network of organizations across the entire value chain right from sourcing of inputs to the retailing of final products with a view to delivering improved value to the customers. It would highlight the linkage of supply chain management (SCM) with Strategy, Operations, Marketing, Finance etc. so that the students can better appreciate the course in the backdrop of all functional domains. The course would attempt to cover the important dimensions of SCM including SC strategy, SC inventory models, Transportation in a SC, Distribution strategy of a SC, SC coordination, Outsourcing strategy, Postponement strategy, Big data in supply chain, Buyer-supplier relationships, Reverse logistics, Sustainable supply chain management etc. It would emphasize developing the conceptual clarity of the students for all important elements of a SC and also equip them with appropriate tools, techniques for analyzing SC-related problems.

#### Course Learning Outcomes:

1. Develop an understanding of the role of supply chain in an organization and the significance of supply chain strategy in overall business.
2. Understand the suitability of different types of inventory models under different situations in the context of a supply chain.
3. Learn various mechanisms available to manage risk and uncertainty in a supply chain and the context under which a particular technique would be applicable.

4. Learn different modes of transportation, different design options of transportation network in a supply chain, their applicability under different contexts and the trade-offs in transportation design.

5. Understand the value of information sharing across entire supply chain for improved supply chain coordination which would result in better operational efficiency of the supply chain.

6. Learn the framework of Make/Buy decisions and different types of supply chain contracts.

7. Understand the significance of big data in supply chain and gather an idea of relevant tools.

8. Understand the importance of reverse logistics in both manufacturing and e-commerce firms.

9. Develop an appreciation about the need of sustainable supply chain management and the relevant framework to adopt the same.

Contents:

**Unit I:** Overview on SCM, Evolution of SCM, Key issues of SCM, Competitive strategy vis-à-vis supply chain strategy, Achieving strategic fit.

**Unit II:** Managing inventory in a Supply Chain: Deterministic models, Probabilistic models (multi-period and single period).

**Unit III:** Managing risk and uncertainty in a supply chain: Quick response strategy, Postponement strategy, Tailored sourcing strategy.

**Unit IV:** Transportation in a Supply Chain: Role of transportation in a supply chain, Modes of transportation and their performance characteristics, Design options for a transportation network, Trade-offs in transportation design.

**Unit V:** Supply chain coordination: Bullwhip effect - causes and consequences, Bullwhip effect quantification, Impact of centralized information on bullwhip effect, mitigating strategies, Information sharing and incentives.

**Unit VI:** Strategic Sourcing in SCM: Role of sourcing in a supply chain, Framework for Make/Buy decisions, Supplier scoring and assessment, Supply contracts and supply chain performance.

**Unit VII:** Big data analytics in SCM: Significance of big data in supply chain, relevant tools.

**Unit VIII:** Reverse Logistics: Reverse logistics in manufacturing organizations and e-commerce firms.

**Unit IX:** Supply chain management: Challenges and opportunities.

**Suggested Readings:**

**Facilitating the achievement of Course Learning Outcomes**

<table>

</tr>
<tr>
<td>III</td>
<td>Learn various mechanisms available to manage risk and uncertainty in a supply chain and the context under which a particular technique would be applicable.</td>
<td>Cases and exercises would be introduced to develop an understanding of different techniques of managing risk in a supply chain.</td>
<td>Exercises through excel modelling</td>
</tr>
</tbody>
</table>
**IV** Learn different modes of transportation, different design options of transportation network in a supply chain, their applicability under different contexts and the trade-offs in transportation design. Small real-life exercises would be introduced to explain the context of transportation in supply chain and the trade-offs between inventory costs and transportation costs. Quiz

**V** Understand the value of information sharing across entire supply chain for improved supply chain coordination which would result in better operational efficiency of the supply chain. A full-length case would be handled to explain the nuances of supply chain coordination. Case write-up

**VI** Learn the framework of Make/Buy decisions and different types of supply chain contracts. A case would be introduced for strategic sourcing and small case exercises would be discussed for supply contracts. Case write-up

**VII** Understand the significance of big data in supply chain and gather an idea of relevant tools. Lecture would be delivered with the help of relevant research papers. Quiz

**VIII** Understand the importance of reverse logistics in both manufacturing and e-commerce firms. A full-length case would be handled to explain different aspects of reverse logistics. Written test

**IX** Develop an appreciation about the need for sustainable supply chain management and the relevant framework to adopt the same. A case would be introduced to discuss different dimensions of sustainable supply chain management. Written test

**MBAFT-7711: SUSTAINABLE OPERATIONS MANAGEMENT**

**Course Objectives:**

Contemporary developments in the business environment suggest that today's organization is required to focus on all three dimensions of sustainability including economy, environment and society, which would enable it to develop sustainable competitive advantage. The phenomenon has assumed great significance in view of the fact that the natural and mineral resources of the earth are limited and further the capacity of the earth to absorb toxic substance is finite. The course is designed to help the students understand the importance of incorporating
sustainability at each stage of supply chain including product design, procurement and inbound logistics, manufacturing, distribution and outbound logistics, product/service use and end-of-life disposition. This would also equip the students with the appropriate tools and techniques for addressing the conflict among three dimensions of sustainability from the perspective of an organization in the context of operations and supply chain functions.

**Course Learning Outcomes:**

1. Understand the importance of sustainability in the context of contemporary business environment.
2. Understand the significance of sustainable operations management as a source of competitive advantage and learn the framework of sustainable operations management.
3. Learn how the concepts of sustainability could be incorporated into new product design.
4. Develop an understanding of the framework/model of sustainable procurement.
5. Understand different mechanisms/techniques of sustainable production.
6. Understand different tools for sustainable distribution and packaging.
7. Learn the concepts of reverse logistics, closed loop supply chain and sustainable supply chain and how the same could be implemented in an organization.
8. Learn the concepts of carbon footprint and water footprint and the related mathematical tools.
9. Develop an understanding of how to measure sustainability in an organization.

**Contents:**

**Unit I:** Sustainability and Future Trends: Sustainability before Sustainable Operations and Supply Chain Management, Impact of Climate Change, Emerging New Consumers, Smart Technologies and the Digital Factory, Sustainable Development and Corporate Social Responsibility, Development of Sustainable Objectives from the Triple Bottom Line Perspective.

**Unit II:** Sustainable Operations Management as a source of Competitive Advantage: Strategic Alignment, Operations and Supply Chain Performance Management and Control, Sustainable Operations and Supply Chain Management: A Reference Framework.

**Unit III:** Sustainability and New Product Design: Life Cycle and Cradle-to-Cradle Approaches, Eco-Efficiency and Eco-Effectiveness, Design for Environment, Design for Re-use and Re-manufacturing.

**Unit IV:** Sustainability and Sourcing & Procurement: Role of Sourcing and Procurement in Delivering Sustainable Solutions, Drivers and Barriers for Sustainable Procurement, Sustainable Procurement Framework/Strategy, Lifecycle Assessment.

**Unit V:** Sustainability and Production: Leveraging Lean Management for a Sustainable Production, Leveraging Six-Sigma for a Sustainable Production, Lean and Green Operations, Servitisation and Leasing.

**Unit VI:** Sustainability and Logistics, Physical Distribution and Packaging: Social and Environmental Aspects in Logistics and Physical Distribution, Carbon Footprint Auditing,
Eliminating Transportation Waste, Warehouse Management and Sustainability, Sustainable Packaging.

**Unit VIII:** Carbon Disclosure and Carbon Footprint Analysis. Water Footprint analysis. Sourcing of water and its sustainable usage in the whole supply chain.

**Unit XI:** Measuring Sustainability: Sustainable Development Measurement, Stakeholder (Customers, Suppliers, Employees, Community, NGOs, Investors) Engagement, Sustainability Metrics, Sustainability Measurement in Companies.

**Suggested Readings:**

8. Relevant research papers.
9. Relevant white papers.

**Facilitating the achievement of Course Learning Outcomes**

**MBAFT-7712: ARTIFICIAL INTELLIGENCE AND DEEP LEARNING**

**Course Objectives:**

Through artificial intelligence, autonomous systems can be designed that can learn, plan, and solve problems. This capability is changing business processes and the role of managers. This will be an introductory course on artificial intelligence in business management, where students would learn the fundamentals and basic methods. Aspects of human computer interaction, limitations of the present technological capabilities and avenues for future developments would also be discussed.

**Course Learning Outcomes:**

1. Understand the meaning of the term "artificial intelligence"
2. Identify capabilities in systems with artificial intelligence and how they are different
from conventional technology enabled systems.
3. Learn basic methods and algorithms
4. Ability to select appropriate technique for solving problems.
5. Understand the present technological progress and develop a perspective for future

Contents:

Unit I: Introduction and motivation for use artificial intelligence in business and industry, Artificial Intelligence methodology and fundamentals.

Unit II: Search algorithms; Population based search; Supervised and unsupervised learning; Decision tree learning; Neural networks.

Unit III: Clustering; Support vector machines; probabilistic reasoning in artificial intelligence; Bayesian networks; statistical learning; fuzzy logic.

Unit IV: Human-computer interaction(HCI); Knowledge management.

Suggested Readings:

**AREA-8: ORGANIZATION BEHAVIOUR AND HUMAN RESOURCE MANAGEMENT (MBAFT-7801 TO MBAFT-7815)**

**MBAFT-7801: HUMAN RESOURCE METRICS AND ANALYTICS**

**Course Objective:**

Organizations are increasingly leveraging human resource data for not only managing current human resources more efficiently but also use analytics for future decisions, from talent acquisition to competency development and from performance management to employee engagement. The objective of this course is to provide a detailed understanding of various qualitative and quantitative measures (metrics) of human resource activities and processes in organizations, research, track and compile these measures into data sets, and use statistical tools
for analysing the data. The course will also familiarise participants in the use of tools to analyse, interpret, and generate reports/ dash boards, for better human resource management decisions.

**Course Content:**

**Module 1: HR Metrics:** Measuring HR functions and Processes: Concepts, Approaches and Objectives; Tools for compiling HR Data and HR metrics (e.g. Balance Score Card, Employee Surveys, Employment Test Scores, etc); HR Functional / process related metrics: Workforce planning metrics, HR Deployment metrics, Recruitment metrics; Selection metrics, Performance metrics, Training / Learning metrics, Compensation and Benefits metrics, Employee Relations metrics; Qualitative and Quantitative HR outcome metrics (Attrition, Absenteeism, Job satisfaction, employee engagement, perceptions and attitude, HRD climate, Safety, wellness, and employee health); Social, Demographic and Occupational metrics (Diversity); Methods of data capture and benchmarking; Aligning HR Metrics and Organizational Performance.

**Module 2: Analytics:** Meaning and scope of analytics in HR; Typical sources of data; Overview of data formats; Quantitative and Qualitative data analysis techniques in HR analytics; Predictive analytics: basic methods and techniques, scenario planning, integration with strategic decisions; Effectiveness and Efficiency – Outcome and Impact analysis; HR Dash Boards; HR Analytics and HR Decisions. Data Integrity and Security Issues.

**Learning Outcomes:**

1. Participants will be able to understand various qualitative and quantitative measures of human resource management processes and outcomes in an organization; and the importance of using data-based reasoning to support HR decisions;
2. Participants will be able to identify (research), track, compile, analyse and interpret human resource data in order to make more effective, evidence-based decisions on managing human resources;
3. Participants will be able to develop research and analytical tools for measuring, analysing, and developing HR decision support scenarios;
4. Participants will be able to apply skills in quantitative and qualitative data analysis using software applications and will be able to do critical analysis of results from HR analytics and communicate (implement) actionable insights.
5. Participants will be able to understand the synergy between HR decisions and outcomes, and organizational performance.

**Suggested Readings:**

**MBAFT-7802: PERFORMANCE MANAGEMENT AND TRAINING INTERVENTION**

**Course Objective:**

The objective of this course is to provide both conceptual and practical insights into performance management system and in managing training and development system. The course is delivered in the form of a skill-based approach in identifying key competencies (KPAs/KRAs), designing performance appraisal form, conducting performance counselling,
tools for training needs assessment, designing training modules, and evaluating training outcomes. The course content is developed along with two modules:

Course Content:

Module 1: Perspectives to Performance Management System; Systems and Formats including Graphic Rating System, Behavioural Anchor System, Balanced Score Card System, and 360-Degree system; Identifying, defining, and measuring performance metrics and competencies (KRAs, KPAs, and KPIs); Formats for scaling and measurement; Designing Appraisal Form; Performance Feedback and Counselling; Potential Assessment and Performance Planning.

Module 2: Performance Management perspective to training sub-system; Designing Training Needs Assessment (TNA) tools; Developing Training Modules including training objectives, lesson plan, and learning climate; Effective delivery of training; Evaluating training outcomes.

Learning Outcome:

1. Participants will be able to understand various stages of a performance management system—from goal setting to performance counselling, and be able to understand various dimensions of managing a training (and development) function effectively;
2. Participants will be able to develop a sample performance appraisal form based on identification of key performance indicators (KPIs) including behavioural competencies from a job description; define and describe KPIs using performance metrics.
3. Participants will be able to learn the nuances of performance feedback and performance counselling;
4. Participants will be able to understand and develop tools for managing training sub-system including developing tools for training needs assessment (TNA), designing training modules, lesson plan, planning for training resources, delivering training sessions, and conducting training evaluation.

Suggested Readings:

The list of cases and specific references including recent articles will be announced in the class at the time of launching of the course.

**MBAFT-7803: MANAGING TRAINING, LEARNING & DEVELOPMENT**

**Course Objective:**

The objective of this course is to provide an in-depth understanding of various stages of learning, training and development process, and planning / managing the training sub-system more effectively in an organization. The course provides a skill-based approach towards designing and developing tools for managing training function including training needs assessment, designing of training / learning modules, resource planning including e-resources and online learning resources, management of support facilities / services, coordination with institutions / experts, and evaluating training / learning outcomes.

**Course Content:**
Module 1: Overview of the Training (Learning and Development) Process and training function in traditional and modern organizations; Stakeholders in training; Internal Customers and their expectations; Understanding changing nature of work place, skills and competencies needed in the context of changing technology, values and aspirations of people.

Module 2: Key components of managing training function: Designing tools for and / or undertaking training needs analysis; Understanding development of training modules using principles and theories of learning; Instructional Objectives and Lesson Plans; Planning for and managing training / learning resources including e-modules, online/offline resources, audio-visual support and training aides; training calendar and training budget; Managing vendors and Institutions; Facility management.

Module 3: Delivery of training/ learning modules including facilitation of training / learning climate, instructional methods; Measuring and evaluating training effectiveness and outcomes, including linkage with performance management and RoI.

Learning Outcome:
1. Participants will be able to understand key components of a training sub-system and the expectations of internal customers from the training function; they will also be able to understand the rapidly changing work places, influence of technology, the need for upgrading/ developing new skills and competencies, and the importance of providing learning/ training opportunities to employees;
2. Participants will be able to understand in detail the four stages of a training cycle, and the role of training manager in monitoring successful culmination of each stage- for example, which training needs assessment tool would be most appropriate for identifying development of behavioural competencies;
3. Participants will be able to understand the functions and responsibilities of a training manager, especially in terms of resource planning, coordination with vendors and institutions, procurement of appropriate learning resources and training aides, management of training facilities, etc.;
4. Participants will be able to develop tools for tracking and measuring training outcomes, including improvement in individual/ team performance, cost-benefit analysis, etc.

Suggested Readings:

The list of cases and specific references including recent articles will be announced in the class at the time of launching of the course.

**MBAFT-7804: TALENT MANAGEMENT**

**Course Objectives:**

Organizations are unlikely to remain competitive without high performing employees to execute team and organizational strategy. The objective of this course is to facilitate students in developing insights and understanding of effective management and development of talent in teams and organizations. The syllabus is intended to help students identify best practices and approaches for talent management. The course is designed for students and executives who will be significantly involved in creating and managing talent.
Course Learning Outcomes:

1. Understanding Talent Management, Challenges and Dilemmas
2. Understanding best HR practices for talent management and managing talent for teams and organizations
3. Gaining insight on talent management in different organizational contexts
4. Developing an understanding of how to identify talent and create development plans using data

Contents:

**Unit I**: Define Talent and Talent Management; historical context of talent management; Challenges and Dilemmas; single-ladder pipeline versus multiple pipelines; aligning strategy and talent management for competitive advantage.

**Unit II**: Best HRM Practices for managing talent/star employees (hiring, rewarding, retaining, performance management and succession planning etc.); employer branding and talent management; Role of social media in talent management

**Unit III**: Talent management in different organizational contexts: global context, disruptive organizations, complex and uncertain scenarios etc.

**Unit IV**: Diversity and Talent; Talent management and future directions

**Unit V**: Talent Analytics; Preparing a talent development plan

### MBAFT-7805: PERSONAL POWER AND LEADERSHIP THROUGH ASIAN VALUES

#### Course Objectives

The objective of the course is to develop a holistic perspective towards self and managerial actions, unleash personal power, and foster organizational excellence. It also aims to nurture value-based leadership that supports diversity and manages change effectively. The course

| I. | Best HRM Practices for managing talent and star performers (hiring, rewarding, retaining, performance management and succession planning etc.); employer branding and talent management; Role of social media in talent management | Case study, simulation, analyses of real-life examples; live case study by practitioner | Class discussion, Quiz, folder analysis |
| II. | Best HRM Practices for managing talent and star performers (hiring, rewarding, retaining, performance management and succession planning etc.); employer branding and talent management; Role of social media in talent management | Case studies and class discussion; In-class analysis of real-life cases; field assignment |
| III. | Talent management in different organizational contexts: global context, disruptive organizations, complex and uncertain scenarios etc. | | |
| IV. | Diversity and Talent; talent management and future directions | Small group discussions in class | Field assignment |
| V. | Talent Analytics; Preparing a talent development plan | Case study; group exercise | Field work and class presentation |

Note: List of cases/ exercises will be announced by the instructor in the class.
contents are based on principles and values enshrined in the Asian psycho – spiritual philosophies, wisdom traditions, epic literature and folklore and draws from Indian Vedanta , Japanese Zen Buddhism and Chinese Taoism.

**Course Learning Outcomes:**

1. Use Asian concepts to become self-aware of strengths and discover innate potential which is the source of personal power.
2. Learn methods and techniques to overcome weakness and foster holistic development that encompasses physical, mental, social and spiritual self.
3. Unleash creativity and attention through Zen – Buddhism methods

MBAFT-7807: MANAGING INTERPERSONAL AND GROUP PROCESSES

Course Objectives:
The objective of this course is to advance understanding regarding interpersonal and group processes and help the students to examine and develop process facilitation skills mainly through laboratory and other experience-based methods of learning.

Course Learning Outcomes:

1. Explain the meaning and importance of work groups as a medium of learning, developing and change.
2. Understand the role of effective interpersonal communication and interpersonal awareness in groups.
3. Identify the sources of interpersonal, intra group and intergroup conflict and understand effective techniques for managing conflict.
4. Detail the nature of power dynamics and influence processes in groups.
5. Identify the factors that facilitate effective group decision making, enhance group performance and increase group cohesiveness.
6. Review the importance and influence of effective team work and understand how the team’s composition influences its effectiveness.

Contents:

Unit I: Group as a medium of learning, developing and change.

Unit II: Interpersonal Communication; Interpersonal Awareness and Feedback process.

Unit III: Interpersonal Trust; Interpersonal, Intra - group and Inter-group Conflict.

Unit IV: Power Dynamics in Groups; Influence Processes.

Unit V: Group Decision making; Group cohesiveness; Group Synergy

Unit VI: The Nature of Teams and Team Development.

Suggested Readings:

The list of cases and specific references including recent articles will be announced in the class at the time of launching of the course.

MBAFT-7809: COUNSELING SKILLS FOR MANAGERS

Course Objectives
The objective of this course is to provide some insights to students into handling behavioural issues at work place by developing counseling skills. It is to help the budding and existing managers and supervisors to develop counseling skills and apply them appropriately in the right situation with the expected outcomes.

Course Learning Outcomes:
1. Understanding the concept of counseling skills in the business environment
2. Develop an understanding of different approaches to counseling
3. Identify the goals and process of counseling in the context of work environment by identifying the procedures and skills of counseling
4. Develop an understanding of organizational application of counseling
5. Understanding how behaviors can be changed by use of counseling skills
6. Identifying and understanding the specific techniques of counseling
7. Understanding the role conflicts as experienced by the counselors and managers
8. Develop an understanding of dealing with the Problem Subordinates
9. Identify the relevance of ethics in counseling

Course Content:

Unit I: Overview of Counseling

Unit II: Introduction to Counseling: Historical evolution; Definition- Common elements; Counseling and Psychotherapy and Instruction; Why workplace Counseling – Goals of Counseling

Unit III: Theoretical Foundations of Counseling: Elements of a Theory; Psychoanalysis; Behaviourism; Humanism
Unit IV: Counselor’s attitudes and Skills in Counseling: Qualities of a Counselor; Counselor’s needs in Counseling; Personal characteristics of an effective Counselor

Unit V: Counseling Process: 5 D Model of counseling process; Initial Interview – Assessing Client’s needs; Rational Emotive Behaviour Therapy (REBT); Final phase – Role of Emotions

Unit VI: Organizational Applications of Counseling Skills: Changing behaviour through Counseling; Specific Techniques; Context of Counseling; Role conflicts of Managers and Counselors; counseling at work place; Problem subordinates

Unit VII: Ethics in Counseling

MBAFT-7810: HUMAN RESOURCE DEVELOPMENT: STRATEGIES AND SYSTEMS

Course Objectives:

The objective of the course is to familiarize the students with the concepts, processes, practices and strategies that form the basis of successful HRD in organizations. The course is designed to facilitate the development of knowledge and skills that HR specialists need in performing their strategic role. It is intended to promote an understanding of how concepts and theories can be put into practice in a variety of organizations.

Course Learning Outcomes:

1. Understanding essentials of HRD and developing insight into principles of system design
2. Developing an understanding for designing career management and mentoring systems in organizations
3. Learning to design programmes for work-life integration and preparing managers for global assignments
4. Understanding applications of HRD for blue collar employees and in managing organizational change
5. Appreciating the importance of evaluating HRD systems through practice.

Contents:

**Unit I:** HRD: Evolution and Concepts; Challenges & Goals of HRD; HRD Function and staffing; Roles and Competencies of HR professionals; Role of Line and Staff managers in HRD; HRD Climate; Systems Approach to HRD; HRD System Design Principles.

**Unit II:** Design & Administration of Select HRD Systems: Career Management; Workplace Mentoring
Unit III: Design & Administration of Select HRD Systems: Work-Life Integration; Developing global managers, HRD systems for International managers.

Unit IV: Applications of HRD: HRD for managing organizational change, HRD for Workers (blue collar employees)

Unit V: HRD Audit; additional HRD systems with Case Examples

MBAFT-7811: MANAGEMENT OF INDUSTRIAL RELATIONS

Course Objective

The purpose of this course is to develop an understanding about the socio-political background, issues and challenges related to employee relations in the Indian context. The course attempts to prepare the student for the ground realities of industrial strife, institutionalized mechanisms to resolve conflicts and instill harmony.

Course Learning Outcomes:

1. Understanding the nature and importance of employee Relations in India with a reflection of the history of unions in India.
2. Develop an understanding of the Economic, social and political environment and labour force in the Indian context.
3. Understanding the constitution, laws and issues related to Trade Unions in India.
4. Role of government in Industrial Relations and Social dialogue
5. An understanding of the worker-management cooperation and importance of participation in Industrial Relations.
6. An Introduction to ILO, adopted ILO conventions and Insights borrowed from foreign Unions
7. An Understanding of Issues related to industrial Conflict, Grievance handling, discipline and various legislations and case laws related to employment
8. An Understanding of the future of Industrial relations in India

Course Contents

Unit I: Introduction to Industrial Relations:
Theories and Models and Approaches of Industrial Relations and history of IR in India. Contemporary issues of IR and the Labour Force; Economic, Political and Social Environment of Industrial Relations

Unit II: Trade Unions
Definition, objectives and legal Framework related to Trade unions in India; Trade Union Act, 1926; Landmark judgments and case laws related to TU; Types, Rights and Issues of TU; Problems confronting TUs; Women in TUs; Managerial Associations; Employer Associations; Paradigm shift in IR policy

Unit III: Collective Bargaining:
Concept, Nature and Legal Framework of CB; Levels of Bargaining and Agreements; Negotiating Techniques and Skills

Unit IV: Tripartism, Social Dialogue and Role of Government in IR
Types and Levels of Tripartism; Social dialogue and reform process; Bipartism’s link with tripartism; Types and Means of government Interventions; Role of State at the State IR Level; Future Role of government

Unit V: Contract of Employment:
Industrial Employment Standing Orders Act, 1946; Test of supervision; Shops and Establishment Act; Inter-State Migrant Workmen Act,1979; The Contract Labour Act, 1970; Contract Labour Code; VRS

Unit VI: Public Policy and Wage and Reward System
Wage Theories; Wage System in India; The Payment of Wages Act, 1936; Minimum Wages Act, 1948; The payment of Bonus Act, 1965; Profit Sharing and Stock Options; National Wage Policy; Wage Policy at the Company Level; Pay Structures; Contemporary Issues in Wage System

Unit VII: Working Conditions, Safety, Health and Environment & Social Security
a) Factories Act; Workers Compensation Act; Employees’ State Insurance Act related to social security; Workers Education
b) Social security; Medical Care; Safety; Occupational health; Welfare funds; Social security reforms during the period of structural Adjustment; Social Security conventions of ILO

**Unit VII: Dispute Resolution and Industrial Harmony:**

Industrial Conflict; Legal Framework: The Industrial Dispute Act, 1947; Role of Labour boards, courts and tribunals; Procedures, power and Duties of Authorities; General prohibition of Strikes and Lockouts; Unfair Labour practices; Recommendations of National Commission of labour; Guiding framework for sound Labour Management Relations; Labour Administrative Machinery

**Unit VIII: Employee Participation and Labour-Management Cooperation**

Labour participation schemes; Constitutional and Legal framework; Indirect representation versus direct participation; Levels of Indirect Participation; Participation versus Collective Bargaining; Suggestion schemes; Quality Circles; Labour Management Cooperation at the shop floor Level and Company level

**Unit IX: Grievance and Discipline Handling**

Managing Employee Grievance; Nature and Cause of Grievance; Guiding principles for Grievance procedure; Grievance Procedure; Interest Issues and Rights Issues; Managing Discipline; Different types of approaches; Different types of punishments; Case laws;

**Unit X: HRM and IR in India**

Management philosophy and Approaches; Integrative Approaches to Human Resource Management; HRM-IR-HRD Integration

**Unit XI: ILO, India and International Labour Standards**

ILO & India; The Case of India; Lessons from foreign Unions; OECD guidelines; The road ahead for Indian IR

**Suggested Readings:**

<td>Analysis of legal cases of violations by organisations</td>
</tr>
<tr>
<td>VIII</td>
<td>This unit helps managers understand the benefits of worker-management cooperation</td>
<td>The students would learn the advantages of worker-management cooperation at the company level as well as the shop floor level through cases and a learning of institutionalised mechanisms. The students would engage in activities related to developing of action plans to promote and facilitate employee participation and labour Management consultation and cooperation.</td>
<td>Case Analysis of existing practices of cooperation</td>
</tr>
<tr>
<td>IX</td>
<td>To understand the legal and behavioural approaches of handling problems related to discipline and grievances.</td>
<td>Students would study the different grievance management procedures being followed in different industries and high performance organisations. Different cases would help them get befriended with ways of dealing with problems related to industrial discipline and positive ways of establishing harmony.</td>
<td>Class test of case laws</td>
</tr>
<tr>
<td>X</td>
<td>This unit widens the horizons of HRM for the student and helps him appreciate the role of HRM in establishing smooth industrial relations.</td>
<td>Cases of Model employers and HRM and HRD practices being followed in these organizations will help students appreciate this nexus.</td>
<td>Group presentation of Case studies</td>
</tr>
</tbody>
</table>
This unit will help shift focus towards ILO and IR in other countries and paves the way for movement of future IR in India. Concepts like OECD guidelines for MNCs would help future managers of MNCs understand their responsibilities. The adopted ILO conventions also provide guidelines for model IR. Learnings from Nordic Unions, UK unions, German Unions etc would widen the scope of the course and its applications. International exposure helps widen the outlook of the young managers dealing with workers.

Group Presentations and viva.

The list of cases and other specific references including recent articles will be announced by the instructor at the time of launching the course.

MBAFT-7812: NEGOTIATION AND INFLUENCE SKILLS

Course Objectives:

The objective of this course is to familiarize the students with the structure and dynamics of negotiation, preparing them for leadership positions. The syllabus is intended to help students develop their skills in effective use of different forms of influence and persuasion strategies in the decision-making process. This course is designed to facilitate students in rethinking of negotiation as a problem-solving tool and improving their negotiating skills and confidence when engaging in important real-world negotiations at work and other settings.

Course Learning Outcomes:

1. Understanding Influence strategies and their application in organizations.
2. Understanding Persuasion and gaining insights on the role of persuasion in driving organizational strategy
3. Developing an insight into fundamentals of negotiation
4. Understanding Gender and Cultural issues in negotiation
5. Appreciating the role of Ethics in Negotiation.

Contents:

Unit I: Basics of Influence; Managerial influence tactics; Social and Psychological Influence strategies; learning to apply influence strategies in work and other settings; power and influence.

Unit II: Persuasion concepts; role of persuasion in strategic leadership.

Unit III: Negotiation basics; Types of negotiation: distributive and integrative; Negotiation Process; Negotiation strategy.

Unit IV: Influence of culture on negotiation; Gender issues in negotiation
**Unit V:** Ethical issues to guide negotiation

MBAFT-7813: CROSS CULTURAL AND GLOBAL MANAGEMENT

Course Objective:
The objective of the course is to provide conceptual framework and diagnostic tools to identify and understand how social and cultural factors influence behaviour of people and how organizational systems, management styles, and human resource practices in multinational and global organizations are influenced by the social and cultural factors. The course is designed to sensitize and create a broader appreciation of the nuances of cultural factors on managerial behaviour, business processes, and in managing human resources in transnational organizations. The course content is broadly grouped into 3 modules.

Course Content:

**Module 1:** Defining and understanding culture, society and nationality; Influence of Social and Cultural Concepts on individual behaviour, managerial styles and organizational processes; Theoretical frameworks to cross-cultural analysis: Kluckhon and Strodtbeck, Murdock, Hall, Lewis, Hofstede, and Trompenaars; Cross-Cultural Research: Hermes and GLOBE studies; Ethics in International Business.

**Module 2:** Human Resource Management in Global Organizations; Recruiting and managing expatriates: Entry and re-entry challenges; Performance Assessment and Learning and Development in MNCs/ Global Companies; Expatriate Compensation; Communication and Negotiation in cross-cultural context; Work related regulatory and legal issues for expatriates.

**Module 3:** Regional and country cluster analysis

Learning Outcome:
1. Participants will be able to understand the influence of social and cultural factors on the behaviour of individual at work places, influence on managerial styles, business strategies, and other organizational processes;
2. Participants will be able to understand the complexity of managing people from diverse social and cultural background in multinational and global organizations;
The course provides a broader canvass of understanding the nuanced influence of culture in organizations across different cultural contexts;

Participants will be able to develop their own contextual framework of cultural factors while travelling / conducting business in different parts of the World.

The entire course is based on case studies and students will be able to understand the influence of social and cultural factors from real world examples.

Suggested Readings:

The list of cases and specific references including recent articles will be announced in the class at the time of launching of the course.

**MBAFT-7815: LEADERSHIP, POWER AND POLITICS**

**Course Objectives:** This course is designed to orient the students of management towards the art and science of influence and Leadership in organizations. Power and politics are an integral part of organizational dynamics and thus it is pertinent for young leaders to know the ways of
navigating through the political jungle to wield influence. As an astute head and strategist, a leader should be able to diagnose the negative forces, anticipate moves and handle resistance to the initiatives that he wants to take.

**Course Learning Outcomes:**

(1) To understand the art and science of leadership and attain new insights about the most suited leadership style.
(2) To gain insights on how to develop younger leaders and their leadership skills and behaviours.
(3) To develop perspectives on how to adapt and lead teams more effectively whilst creating a top-line perspective on strategy and implementation.
(4) To be able to diagnose the true distribution of power in organizations, identify strategies for building sources of power, and develop techniques for influencing others, and understand the role of power in building cooperation and leading change in organizations.
(5) Learn the skills related to the political aspects of management in organizations.
(6) Understand about the political dynamics of organization and reflect on one’s own management style and influence style, along with the development of a personal agenda for successful political management of one’s own career.
(7) Understand the importance of relationships with organizational stakeholders and social and business networks.

**Contents:**

**Unit 1: Nature of Leadership**

Leadership and business of living, Art and Science of Leadership, Leadership as a process and not a position, Approaches to Leadership, Myths about Leadership

**Unit 2: Developing Leaders**

Personality and Leadership, Founder as a leader, Developing junior leaders, Courage, Morals and Leadership, Leadership Skills, Leader-Communication

**Unit 3: Strategic Leadership and Culture**

Shaping Culture and Values through Leadership, Leadership Diversity, Leading Teams, Developing Vision and Direction, Leading Learning Organizations, Development Planning and Leading Change, Startups, Lifecycle and Leadership choice

**Unit 4: Power and Influence**

**Unit 5: Organizational Politics**
Positive and Negative Politics, Organizational politics and Silos, Coalition Politics, Career Politics, Network politics, Diagnosis of Organizational politics, Survival in the political jungle
