

## Extra-Curricular Activities

At the Department of Botany, we do not forget to have fun! Students and faculty participate in annual field trips (fun and learning), picnics and sports organized at the department. These activities give relief from the apparently unending, stressful routine of lectures, laboratory classes, reports, assignments, reading, not to speak of examinations, as well as nurturing connections that serve students in the long run. Members of the department are also involved in activities of NGOs and other community outreach programs in their personal capacities.

Some of the department-organized activities may be viewed in the links below.
