Specification for Gel Documentation System (Gel Doc XR⁺)

- 1- Imaging system should have Automatic capabilities with Application driven, user selected or recalled by a protocol.
- 2- Should have 100 % repeatability via recallable protocols.
- 3- Image resolution > 4MP
- 4- System should have pre-calibrated focus for any zoom settings & sample height.
- 5- Should have appropriate flat fielding correction automatically & consistently applied to image data for every application..
- 6- Versatile system to support wide range of applications like- Fluorescent dye like sybr green, sybr safe, Western blotting, 2-D, 1-D, Dot Blotting, Nucleic acid detection , Qunatitation etc.
- 7- System should have **stain-Free capability** for stain-free gels and blots.
- 8- Should have true 12 bit true CCD camera.
- 9- System can take max. **Sample size 28 X 36 cm.**
- 10- System should have precalibrated & optimized **dynamic image flat fielding**
- 11- It should universal dark hood & **upgradeable to chemiluminescence.**
- 12- Should have motorized zoom lens- f/1.2, 12-75mm with numerical feedback value to reduce the experimental variation -Capable of Optimizing, saving, and quickly recalling the imaging acquisition settings
- 13- **Safe DNA Imaging** without UV exposure- using Conversion screen to prevent damage from UV and preserve samples for downstream protein production.
- 14- Reproducibly position or center the sample on the image platen by using gel alignment templates.
- 15- System should be provided with a pack of **10% Stain Free Gels/solution**, sufficient to cast as many as 90-100 1.00 mm mini gels. This should preferably be available from the same manufacturer.
- 16- Should come with 1 D analysis software with following features:-
 - Software should have highest level of automation in hardware calibration, image optimization, capture, and analysis.
 - Software should mandatorily have the algorithm for **automated normalization/** house keeping protein free normalization.
 - Should have automated workflow recorded in a protocol file from image capture to results thus eliminates need for training.
 - Should allow 100% repeatability of the workflow by any user and ensures optimized image data and analysis from a gel in a single uninterrupted, fast, and completely reproducible workflow.
 - Should have automated image capture driven by a selected gel or blot application.
 - Should have one-button acquisition from image capture to result.
 - Should generate the publication ready images with one click export option.
 - Should generate customizable reports.
- 17- Should come with Branded Data processor with licensed Operating System compatible with Gel Doc System.
- 18- Desktop and Online UPS with power backup should be provided
- 19- System should have all inclusive warranty for three years.
