

University Faculty Details Page on DU Web-site

Title	Dr.	First Name	Surajit	Last Name	Sarkar	Photograph 
Designation		Assistant Professor				
Department		Genetics				
Address		Flat no.- 6, Type- IV, Block- I University of Delhi, South Campus Benito Juarez Road, Dhaula Kuan New Delhi-110 021, India				
Phone No	Office	+91-11-24117325				
	Mobile	+91-9968350077				
Fax		+91-11-24112761				
Email		sarkar@south.du.ac.in sarkar.surajit@gmail.com				
Web-Page		https://sites.google.com/site/udscflylab/home http://genetics.du.ac.in/index.php?page=dr-surajit-sarkar				
Educational						
Degree	Institution	Year	Details			
Ph.D	Banaras Hindu University	2007	Thesis topic: Studies on the role of Hsp60C in development and fertility in <i>Drosophila melanogaster</i> .			
M.Sc.	Banaras Hindu University	2001	Subjects: Molecular and Human Genetics			
B.Sc.	Banaras Hindu University	1999	Subjects: Botany (Hons.), Chemistry, Industrial Microbiology			
Career Profile						
Organization / Institution		Designation	Duration	Role		
University of Delhi (South Campus)		Assistant Professor	2007-present	Teaching & Research		
California Institute of Technology (Caltech) California, USA		Visiting Associate	2010 - 2011	Research		
Research Interests / Specialization						
My research interest is primarily focused on to explore the cellular and developmental basis of some fatal human neurodegenerative disorders such as Huntington's disease, Alzheimer's disease, Parkinson's disease etc., and to identify novel drug targets to restrict the pathogenesis of these devastating human illnesses. In addition, my research team is also interested in deciphering the role(s) of some novel genes in development and aging process in <i>Drosophila</i> model system.						
Teaching Experience (Subject / Courses Taught)						
2007-present: Cytogenetics, Chromosomes Genes and Genome, Molecular Techniques, Cell biology, Recombinant DNA technology, Advances in <i>Drosophila</i> Genetics, Instrumentation.						
Honors & Awards						
<ul style="list-style-type: none"> ❖ Junior/Senior Research Fellowship, (NET) Council of Scientific and Industrial Research (CSIR), New Delhi. ❖ Dr. Manashi Ram Prize for Best Paper Presentation in 28th All India Cell Biology Conference & Symposium on Genome Biology-2004. ❖ Young Scientist Award (2009), Department of Science and Technology (DST), Government of India, New Delhi. 						

❖ BOYSCAST Fellow (2009-10), Department of Science and Technology (DST)
❖ Innovative Young Biotechnologist Award-2017 (IYBA-2017), Department of Biotechnology (DBT), Government of India, New Delhi.
RESEARCH GUIDANCE:
Ph.D (awarded) : 3
Working for Ph.D: 4
M. Phil (awarded): 2
I. Research papers published in Refereed/Peer Reviewed Journals: (LAST FIVE YEARS)

- ❖ Soram Idiyasan Chanu and Surajit Sarkar (2013) Identification of *Drosophila myc* (a human homolog of c-myc) as a novel genetic modifier of human Tauopathies. (Abs. no.P16) SYSCON-2013, AIIMS, New Delhi.
- ❖ Soram Idiyasan Chanu and Surajit Sarkar (2013) Identification of *Drosophila myc* (a human homolog of c-myc) as a novel genetic modifier of human Tauopathies. (Abs. no. P191) 7th Annual Convention of ABAP & International Conference on Plant Biotechnology, Molecular Medicine & Human Health, Delhi University South Campus, New Delhi.
- ❖ Soram Idiyasan Chanu and Surajit Sarkar (2013) *Drosophila myc* (a human homolog of c-myc): a novel genetic modifier of human Tauopathies. (Abs. no. P48) 37th All India Cell Biology Conference and Symposium on Cell dynamics and Cell fate, Indian Institute of Science, Bangalore.
- ❖ Renu Yadav, Suman Kundu and Surajit Sarkar (2014) Deciphering the role of multiple globin1 in *Drosophila*. (Abstract no. P24). XVIII International meeting "Oxygen-binding and sensing proteins". 6-10 July 2014, University of Sheffield, Sheffield, UK.
- ❖ Kritika Raj and Surajit Sarkar (2014) Modulation of insulin signalling alleviates poly(Q) mediated neurotoxicity in *Drosophila*. XXXVIII All India cell Biology Conference (December 10-12, 2014), CDRI, Lucknow. (Abstract no. P024).
- ❖ Renu Yadav and Surajit Sarkar (2014) Decoding the functional significance of Hemoglobin1 (glob1) in *Drosophila*. XXXVIII All India cell Biology Conference (December 10-12, 2014), CDRI, Lucknow. (Abstract no. P025).
- ❖ Soram Idiyasan Chanu and Surajit Sarkar (2014) A Novel approach to suppress human Tauopathies in *Drosophila* disease model. XXXVIII All India cell Biology Conference (December 10-12, 2014), CDRI, Lucknow. (Abstract no. P026).
- ❖ M. Dhruva Singh and Surajit Sarkar (2014) Myc proto-oncogene: A Novel suppressor of Human poly(Q) disorders. XXXVIII All India cell Biology Conference (December 10-12, 2014), CDRI, Lucknow. (Abstract no. P041).
- ❖ Soram Idiyasan Chanu and Surajit Sarkar (2015) Targeted downregulation of dMyc (a homologue of human c-myc proto-oncogene) suppresses human taupathies in *Drosophila* disease models. 5th National Science Day Symposium (27-28 February, 2015), Delhi University South Campus, New Delhi. Abstract no. P12 (won 2nd prize).
- ❖ Renu Yadav and Surajit Sarkar (2014) Deciphering the biological implications of Hemoglobin 1 (glob1) in *Drosophila*. (Abstract no. P22). 5th National Science Day Symposium (27-28 February, 2015), Delhi University South Campus, New Delhi.
- ❖ Kritika Raj and Surajit Sarkar (2014) Alleviation of poly(Q) mediated neurotoxicity by modulating insulin signalling in *Drosophila* disease models. 5th National Science Day Symposium (27-28 February, 2015), Delhi University South Campus, New Delhi. Abstract no. P24.
- ❖ M. Dhruva Singh, Kritika Raj and Surajit Sarkar (2015) Myc proto-oncogene, a novel genetic modifier suppresses human poly(Q) induced neurotoxicity by modulating the level of global histone acetylation in *Drosophila*. DBT-Young Investigator meeting (from 27.03.2015 to 01.04.2015), Srinagar, Jammu & Kashmir, India. Abs no. 108.
- ❖ Soram Idiyasan Chanu and Surajit Sarkar (2015) Targeted downregulation of dMyc (a homologue of human c-myc proto-oncogene) suppresses human taupathies in *Drosophila* disease models. 5th National Science Day

Symposium (27-28 February, 2015), Delhi University South Campus, New Delhi. Abstract no. P12 (won 2nd prize).

- ❖ Nisha and Surajit Sarkar (2015) *Drosophila* globin: a novel suppressor of human Tau mediated neurodegeneration and cellular toxicity. The XXXIX All India Cell Biology Conference on cellular organization and dynamics. (6-8 December, 2015, IISR-Trivandrum, India) Abstract No. -056.
- ❖ Kritika Raj and Surajit Sarkar (2015) Targeted upregulation of human c-Myc alleviates poly(Q) mediated neurotoxicity in *Drosophila* disease model (21-23 December 2015, IIT-Kanpur, India) Abstract no. P-45.
- ❖ Soram Idiyasan Chanu and Surajit Sarkar (2015) Human Tau-mediated neurodegeneration in *Drosophila* caused neurofibrillary tangles which could be alleviated by downregulation of dMyc. (21-23 December 2015, IIT-Kanpur, India) Abstract no. P-45
- ❖ Kritika Raj, Surajit Sarkar (2016) Tissue specific overexpression of c-myc mitigates human poly(Q) induced neurodegeneration in *Drosophila* disease model. (July 13-17, 2016), The Allied Genetics Conference (Genetics Society of America), Orlando World Center Marriott, Florida, USA. (Abstract no. D1380B)
- ❖ XIXth International meeting on Oxygen binding and sensing proteins (XIXth O2BIP) during 11.09.2016 to 14.09.2016 at University of Hamburg, Hamburg, Germany. (Session 6 - 17:05-17:20 PM) (Title of the invited talk-*Drosophila* glob1 is required for development and oxidative stress response)
- ❖ Brain storming session on Glial Cells in Health and disease (2-3 February, 2017) at School of Studies in Neuroscience, Jiwaji University, Gwalior-474011) Title of the talk- "Studies on the role of glial cells in progression of human neurodegenerative disorders and aging mediated neuronal impairments in *Drosophila*".
- ❖ Symposium on Gene-Environment Interaction in disease, development and evolution (March, 5-6, 2017) at Banaras Hindu University. (Title of the talk- Excavating amicable molecular targets to curb Neurofibrillary Tangles (NFT) mediated pathogenesis of human neuronal tauopathies in *Drosophila*).
- ❖ Surajit Sarkar (2017) Conserved Mechanism of Tau Pathogenesis in Human and *Drosophila*- Invited talk in 3rd Indian *Drosophila* research Conference (6 to 9 December 2017; Indian Institute of Science Education & Research (IISER), Bhopal.
- ❖ Soram Idiyasan Chanu and Surajit Sarkar (2018) Tau, tangles, and tauopathies in *Drosophila* disease models (Invited platform presentation; 27-31 January, 2018; International Congress of Cell Biology 2018 – CCMB).
- ❖ Pragati, Soram Idiyasan Chanu and Surajit Sarkar (2018) Neurofibrillary Tangles (NFTs) mediated pathogenesis of human neuronal tauopathies in *Drosophila* could be restricted by tissue specific downregulation of dMyc. (P285 – 20180566 -S; 27-31 January, 2018; International Congress of Cell Biology 2018 – CCMB).
- ❖ Nisha and Surajit Sarkar (2018) *Drosophila* glob1 is required for the development of nervous system. (Abstract No. P526– 20180565-S; 27-31 January, 2018; International Congress of Cell Biology 2018 – CCMB)
- ❖ Surajit Sarkar (2018) Neurofibrillary tangles (NFTs) mediated conserved mechanism of the pathogenesis of neuronal tauopathies in human and *Drosophila*. 10th Young Investigators' Meetin-2018 (YIM-2018), 5th to 8th March 2018; Thiruvannanthpuram.

Professional Societies Memberships

- ❖ Life member: Indian Society of Cell Biology
- ❖ Life member: Indian Society of Translational Research
- ❖ Member: Indian Society of Developmental Biologists
- ❖ Treasurer: Indian Society of Cell Biology

Project (Major/Grants/Collaborations)

ONGOING RESEARCH PROJECTS:

1. Excavating the role of Neurofibrillary Tangles (NFTs) in pathogenesis of human Tauopathies in *Drosophila* disease models. (DBT)
2. Studies on the role of Insulin Signalling in mitigation of human poly(Q) induced neurodegeneration in *Drosophila* disease models. (DBT)
3. Functional Elucidation of Multiple Globin Genes in *Drosophila melanogaster*. (DST)
4. Studies on the role of globin gene in suppression of human tauopathy mediated neurodegeneration in

***Drosophila* disease models. (CSIR)**

COMPLETED RESEARCH PROJECTS:

In the last five years:

- 1. Characterizing Novel Globins Across Species and Deciphering their Stress Response and Interacting Partners: An Integrated, Holistic Approach for Function Elucidation. (DU/DST-PURSE)**
- 2. Studies on the role of Forkhead Transcription Factor (FOXO) in neurogenesis and aging in *Drosophila*. (DBT)**
- 3. Studies on the modifier capacity of proto- oncogene(s) during progression of Poly(Q) induced neurodegeneration. (DBT)**
